Search Processing Language

A Splunk search is a series of commands and arguments. Commands are chained together with a pipe "|" character to indicate that the output of one command feeds into the next command on the right.

```
search | command1 argument1a |
command2 argument2 | ...
```

At the start of the search pipeline is an implied search command to retrieve events from the index. Search requests are written with keywords, quoted phrases, boolean expressions, wildcards, field name/value pairs, and comparison expressions. The AND operator is implied between search terms. For example:

```
sourcetype=access_combined error |
top 5 uri
```

This search retrieves indexed web activity events that contain the term "error". For those events, it returns the top 5 most common URI values.

Search commands are used to filter unwanted events, extract more information, calculate values, transform, and statistically analyze the indexed data. Think of the search results retrieved from the index as a dynamically created table. Each indexed event is a row. The field values are columns. Each search command redefines the shape of that table. For example, search commands that filter events will remove rows, search commands that extract fields will add columns.

Time Modifiers

You can specify a time range to retrieve events online with your search by using the `latest` and `earliest` search modifiers. The relative times are specified with a string of characters to indicate the amount of time (integer and unit) and an optional "snap to" time unit. The syntax is:

```
[+|-]<integer><unit>@<snap_time_
unit>
```

The search `"error earliest=-1d@d latest=-h@h"` retrieves events containing "error" that occurred yesterday snapping to the beginning of the day (00:00:00) and through to the most recent hour of today, snapping on the hour.

The snap to time unit rounds the time down. For example, if it is 11:59:00 and you snap to hours (@h), the time used is 11:00:00 not 12:00:00. You can also snap to specific days of the week using @w0 for Sunday, @w1 for Monday, and so on.

Subsearches

A subsearch runs its own search and returns the results to the parent command as the argument value. The subsearch is run first and is contained in square brackets. For example, the following search uses a subsearch to find all syslog events from the user that had the last login error:

```
sourcetype=syslog [ search login
error | return 1 user ]
```

Optimizing Searches

The key to fast searching is to limit the data that needs to be pulled off disk to an absolute minimum. Then filter that data as early as possible in the search so that processing is done on the minimum data necessary.

Partition data into separate indexes, if you will rarely perform searches across multiple types of data. For example, put web data in one index, and firewall data in another.

Limit the time range to only what is needed. For example `-1h` not `-1w`, or `earliest=-1d`.

Use Fast Mode to increase the speed of searches by reducing the event data that they return.

Search as specifically as you can. For example, `fatal_error` not `"error"`

Filter out results as soon as possible before calculations. Use field-value pairs, before the first pipe. For example, `ERROR status=404 |...` instead of `ERROR | search status=404...` Or use filtering commands such as `where`.

Filter out unnecessary fields as soon as possible in the search.

Postpone commands that process over the entire result set (non-streaming commands) as late as possible in your search. Some of these commands are: `dedup`, `sort`, and `stats`.

Use post-processing searches in dashboards.

Use summary indexing, report acceleration, and data model acceleration features.

Common Search Commands

Command	Description
`chart/timechart`	Returns results in a tabular output for (time-series) charting.
`dedup`	Removes subsequent results that match a specified criterion.
`eval`	Calculates an expression. See COMMON EVAL FUNCTIONS.
`fields`	Removes fields from search results.
`head/tail`	Returns the first/last N results.
`lookup`	Adds field values from an external source.
`rename`	Renames a field. Use wildcards to specify multiple fields.
`rex`	Specifies regular expression named groups to extract fields.
`search`	Filters results to those that match the search expression.
`sort`	Sorts the search results by the specified fields.
`stats`	Provides statistics, grouped optionally by fields. See COMMON STATS FUNCTIONS.
`table`	Specifies fields to keep in the result set. Retains data in tabular format.
`top/rare`	Displays the most/least common values of a field.
`transaction`	Groups search results into transactions.
`where`	Filters search results using eval expressions. Used to compare two different fields.

Splunk Search Reference Guide:

Splunk 7.x Quick Start Guide James H. Baxter,2018-11-29 Learn how to architect implement and administer a complex Splunk Enterprise environment and extract valuable insights from business data Key FeaturesUnderstand the various components of Splunk and how they work together to provide a powerful Big Data analytics solution Collect and index data from a wide variety of common machine data sourcesDesign searches reports and dashboard visualizations to provide business data insightsBook Description Splunk is a leading platform and solution for collecting searching and extracting value from ever increasing amounts of big data and big data is eating the world This book covers all the crucial Splunk topics and gives you the information and examples to get the immediate job done You will find enough insights to support further research and use Splunk to suit any business environment or situation Splunk 7 x Quick Start Guide gives you a thorough understanding of how Splunk works You will learn about all the critical tasks for architecting implementing administering and utilizing Splunk Enterprise to collect store retrieve format analyze and visualize machine data You will find step by step examples based on real world experience and practical use cases that are applicable to all Splunk environments There is a careful balance between adequate coverage of all the critical topics with short but relevant deep dives into the configuration options and steps to carry out the day to day tasks that matter By the end of the book you will be a confident and proficient Splunk architect and administrator What you will learnDesign and implement a complex Splunk Enterprise solutionConfigure your Splunk environment to get machine data in and indexedBuild searches to get and format data for analysis and visualizationBuild reports dashboards and alerts to deliver critical insightsCreate knowledge objects to enhance the value of your dataInstall Splunk apps to provide focused views into key technologiesMonitor troubleshoot and manage your Splunk environmentWho this book is for This book is intended for experienced IT personnel who are just getting started working with Splunk and want to quickly become proficient with its usage Data analysts who need to leverage Splunk to extract critical business insights from application logs and other machine data sources will also benefit from this book *Mastering Splunk* James Miller,2014-12-17 This book is for those Splunk developers who want to learn advanced strategies to deal with big data from an enterprise architectural perspective You need to have good working knowledge of Splunk **Splunk Operational Intelligence Cookbook** Josh Diakun,Paul R Johnson,Derek Mock,2016-06-08 Over 70 practical recipes to gain operational data intelligence with Splunk Enterprise About This Book This is the most up to date book on Splunk 6 3 and teaches you how to tackle real world operational intelligence scenarios efficiently Get business insights using machine data using this easy to follow guide Search monitor and analyze your operational data skillfully using this recipe based practical guide Who This Book Is For This book is intended for users of all levels who are looking to leverage the Splunk Enterprise platform as a valuable operational intelligence tool The recipes provided in this book will appeal to individuals from all facets of business IT security product marketing and many more Also existing users of Splunk who want to upgrade and get up and

running with Splunk 6 3 will find this book invaluable What You Will Learn Use Splunk to gather analyze and report on data Create dashboards and visualizations that make data meaningful Build an operational intelligence application with extensive features and functionality Enrich operational data with lookups and workflows Model and accelerate data and perform pivot based reporting Build real time scripted and other intelligence driven alerts Summarize data for longer term trending reporting and analysis Integrate advanced JavaScript charts and leverage Splunk s API In Detail Splunk makes it easy for you to take control of your data and with Splunk Operational Cookbook you can be confident that you are taking advantage of the Big Data revolution and driving your business with the cutting edge of operational intelligence and business analytics With more than 70 recipes that demonstrate all of Splunk s features not only will you find quick solutions to common problems but you ll also learn a wide range of strategies and uncover new ideas that will make you rethink what operational intelligence means to you and your organization You ll discover recipes on data processing searching and reporting dashboards and visualizations to make data shareable communicable and most importantly meaningful You ll also find step by step demonstrations that walk you through building an operational intelligence application containing vital features essential to understanding data and to help you successfully integrate a data driven way of thinking in your organization Throughout the book you ll dive deeper into Splunk explore data models and pivots to extend your intelligence capabilities and perform advanced searching to explore your data in even more sophisticated ways Splunk is changing the business landscape so make sure you re taking advantage of it Style and approach Splunk is an excellent platform that allows you to make sense of machine data with ease The adoption of Splunk has been huge and everyone who has gone beyond installing Splunk wants to know how to make most of it This book will not only teach you how to use Splunk in real world scenarios to get business insights but will also get existing Splunk users up to date with the latest Splunk 6 3 release Splunk: Enterprise Operational Intelligence Delivered Betsy Page Sigman,Erickson Delgado,Josh Diakun,Paul R Johnson,Derek Mock,Ashish Kumar Tulsiram Yadav,2017-02-28 Demystify Big Data and discover how to bring operational intelligence to your data to revolutionize your work About This Book Get maximum use out of your data with Splunk s exceptional analysis and visualization capabilities Analyze and understand your operational data skillfully using this end to end course Full coverage of high level Splunk techniques such as advanced searches manipulations and visualization Who This Book Is For This course is for software developers who wish to use Splunk for operational intelligence to make sense of their machine data The content in this course will appeal to individuals from all facets of business IT security product marketing and many more What You Will Learn Install and configure the latest version of Splunk Use Splunk to gather analyze and report data Create Dashboards and Visualizations that make data meaningful Model and accelerate data and perform pivot based reporting Integrate advanced JavaScript charts and leverage Splunk s APIs Develop and Manage apps in Splunk Integrate Splunk with R and Tableau using SDKs In Detail Splunk is an extremely powerful tool for searching exploring and visualizing data of all

types Splunk is becoming increasingly popular as more and more businesses both large and small discover its ease and usefulness Analysts managers students and others can quickly learn how to use the data from their systems networks web traffic and social media to make attractive and informative reports This course will teach everything right from installing and configuring Splunk The first module is for anyone who wants to manage data with Splunk You ll start with very basics of Splunk installing Splunk before then moving on to searching machine data with Splunk You will gather data from different sources isolate them by indexes classify them into source types and tag them with the essential fields With more than 70 recipes on hand in the second module that demonstrate all of Splunk s features not only will you find quick solutions to common problems but you ll also learn a wide range of strategies and uncover new ideas that will make you rethink what operational intelligence means to you and your organization Dive deep into Splunk to find the most efficient solution to your data problems in the third module Create the robust Splunk solutions you need to make informed decisions in big data machine analytics From visualizations to enterprise integration this well organized high level guide has everything you need for Splunk mastery This learning path combines some of the best that Packt has to offer into one complete curated package It includes content from the following Packt products Splunk Essentials Second Edition Splunk Operational Intelligence Cookbook Second Edition Advanced Splunk Style and approach Packed with several step by step tutorials and a wide range of techniques to take advantage of Splunk and its wide range of capabilities to deliver operational intelligence within your enterpise *SPLK-1002 Practice Questions for Splunk Core Certified Power User Certification* Dormouse Quillsby, NotJustExam SPLK 1002 Practice Questions for Splunk Core Certified Power User Certification Struggling to find quality study materials for the Splunk Certified Core Certified Power User SPLK 1002 exam Our question bank offers over 180 carefully selected practice questions with detailed explanations insights from online discussions and AI enhanced reasoning to help you master the concepts and ace the certification Say goodbye to inadequate resources and confusing online answers we re here to transform your exam preparation experience Why Choose Our SPLK 1002 Question Bank Have you ever felt that official study materials for the SPLK 1002 exam don t cut it Ever dived into a question bank only to find too few quality questions Perhaps you ve encountered online answers that lack clarity reasoning or proper citations We understand your frustration and our SPLK 1002 certification prep is designed to change that Our SPLK 1002 question bank is more than just a brain dump it s a comprehensive study companion focused on deep understanding not rote memorization With over 180 expertly curated practice questions you get Question Bank Suggested Answers Learn the rationale behind each correct choice Summary of Internet Discussions Gain insights from online conversations that break down complex topics AI Recommended Answers with Full Reasoning and Citations Trust in clear accurate explanations powered by AI backed by reliable references Your Path to Certification Success This isn t just another study guide it s a complete learning tool designed to empower you to grasp the core concepts of Core Certified Power User Our practice questions prepare you for
