Momentum Daniel Seymour, 2015-12-07 An era of accountability has swept over the higher education landscape Everyone it seems legislatures think tanks newspapers magazines books and bloggers wants to hold colleges and universities accountable They are attaching strings to budgets producing reports that read like exposés developing clever systems to rank and sort us and writing books and articles that describe the end of college as we know it According to them we need to be reformed reimaged and rebooted *Momentum* changes the conversation from how others are holding higher education accountable to why colleges and universities need to embrace the need to demonstrate their own responsibility The responsibility paradigm that emerges fundamentally shifts the dialogue from fixing to preventing from reacting to creating from surviving to thriving To implement this new paradigm the dynamics of virtuous cycles are introduced and described These upward spirals build on their own successes and result in growing confidence a sense of vitality and resilience The future of these institutions isn't the result of outside pressure or reformers The future is something that can and should be created by those who take responsibility for it

The War of Guns and Mathematics David Aubin, Catherine Goldstein, 2014-10-07 For a long time World War I has been shortchanged by the historiography of science Until recently World War II was usually considered as the defining event for the formation of the modern relationship between science and society In this context the effects of the First World War by contrast were often limited to the massive deaths of promising young scientists By focusing on a few key places Paris Cambridge Rome Chicago and others the present book gathers studies representing a broad spectrum of positions adopted by mathematicians about the conflict from militant pacifism to military

scientific or ideological mobilization The use of mathematics for war is thoroughly examined This book suggests a new vision of the long term influence of World War I on mathematics and mathematicians Continuities and discontinuities in the structure and organization of the mathematical sciences are discussed as well as their images in various milieux Topics of research and the values with which they were defended are scrutinized This book in particular proposes a more in depth evaluation of the issue of modernity and modernization in mathematics The issue of scientific international relations after the war is revisited by a close look at the situation in a few Allied countries France Britain Italy and the USA The historiography has emphasized the place of Germany as the leading mathematical country before WWI and the absurdity of its postwar ostracism by the Allies The studies presented here help explain how dramatically different prewar situations prolonged interaction during the war and new international postwar organizations led to attempts at redrafting models for mathematical developments *DIRECTORY OF CORPORATE COUNSEL*, 2023 The Cobra Movement in Postwar Europe

Karen Kurczynski, 2020-07-12 This book examines the art of Cobra a network of poets and artists from Copenhagen Brussels and Amsterdam 1948 1951 Although the name stood for the organizers home cities the Cobra artists hailed from countries in Europe Africa and the United States This book investigates how a group of struggling young artists attempted to reinvent the international avant garde after the devastation of the Second World War to create artistic experiments capable of facing the challenges of postwar society It explores how Cobra s experimental often collective art works and publications relate to broader debates in Europe about the use of images to commemorate violent events the possibility of free expression in an art world constrained by Cold War politics the breakdown of primitivism in an era of colonial independence movements and the importance of spontaneity in a society increasingly dominated by the mass media This book will be of interest to scholars in art history 20th century modern art avant garde arts and European history **Section of Antitrust Law** American Bar Association.
