Physics and the Environment Kyle Forinash, 2017-07-05 Physics and the Environment directly connects the physical world to environmental issues that the world is facing today and will face in the future It shows how the first and second laws of thermodynamics limit the efficiencies of fossil fuel energy conversions to less than 100% while also discussing how clever technologies can enhance overall performance It also extensively discusses renewable forms of energy their physical constraints and how we must use science and engineering as tools to solve problems instead of opinion and politics Dr Kyle Forinash takes you on a journey of understanding our mature and well developed technologies for using fossil fuel resources and how we are unlikely to see huge gains in their efficiency as well as why their role in climate change ought to be an argument for their replacement sooner rather than later He also discusses the newest technologies in employing renewable resources and how it is important to understand their physical constraints in order to make a smooth transition to them An entire chapter is dedicated to energy storage a core question in renewable energy as well as another chapter on the technical issues of nuclear energy The book ends with a discussion on how no environmental solution no matter how clever from a technical aspect will succeed if there are cheaper alternative even if those alternatives have undesirable features associated with them

Compelled to Act Sarah Carter, Nanci Langford, 2020-10-02 Compelled to Act showcases fresh historical perspectives on the diversity of women s contributions to social and political change in prairie Canada in the twentieth century including but looking beyond the era of suffrage activism In our current time of revitalized activism against racism colonialism violence and misogyny this volume reminds us of the myriad ways women have challenged and confronted injustices and inequalities The women and their activities shared in Compelled to Act are diverse in time place and purpose but there are some common threads In their attempts to correct wrongs achieve just solutions and create change women experienced multiple sites of resistance both formal and informal The acts of speaking out of organizing of picketing and protesting were characterized as unnatural for women as violations of gender and societal norms and as dangerous to the state and to family stability Still as these accounts demonstrate prairie women felt compelled to respond to women s needs to challenges to family security both health and economic and to the need for community They reacted with the resources at hand and beyond to support effective action joining the ranks of women all over the world seeking political and social agency to create a society more responsive to the needs of women and their children

Notley Nation Sydney Sharpe, Don Braid, 2016-11-05 1 Edmonton Journal Bestseller 2017 Alberta Literary Awards the Wilfrid Eggleston Award for Nonfiction

Winner Rachel Notley's dramatic triumph over Alberta's Conservative regime was an early rumble before the Trudeau landslide Alberta has long been seen as politically paralyzed But it has always been a cauldron of discontent producing the Reform Party the Wildrose movement the modern Conservative Party of Canada and Stephen Harper Notley Nation tells how this pent up energy exploded in an unexpected direction with Rachel Notley's NDP victory Stereotypes of redneck Alberta have long been at odds with the province's growing progressive streak The political upheaval that swept conservatism out of office in 2015 had shown its first tremors there five years earlier Progressive mayors were elected in Calgary and Edmonton and soon it became clear that the province's PC government was falling out of touch with modern Alberta Political journalists Sydney Sharpe and Don Braid explore how the Alberta NDP ended a forty three year Conservative dynasty that proved incapable of adapting to forces beyond its control or understanding That wave would soon spread across the country sweeping Justin Trudeau into office

The State of the System Paul W. Bennett, 2020-09-23 Over the last fifty years Canada's public schools have been absorbed into a modern education system that functions much like Max Weber's infamous iron cage Crying out for democratic school level reform the system is now a centralized bureaucratic fortress that every year becomes softer on standards for students less accessible to parents further out of touch with communities and surprisingly unresponsive to classroom teachers Exploring the nature of the Canadian education order in all its dimensions The State of the System explains how public schools came to be so bureaucratic confronts the critical issues facing kindergarten to grade 12 public schools in all ten provinces and addresses the need for systemic reform Going beyond a diagnosis of the stresses strains and ills present in the system Paul Bennett proposes a bold plan to re engineer schools on a more human scale as the first step in truly reforming public education In place of school consolidation and managerialism one size fits all uniformity limited school choice and the success for all curriculum Bennett advocates for a new set of priorities decentralize school governance deprogram education ministries and school districts listen to parents and teachers and revitalize local education democracy Tackling the thorny issues besetting contemporary school systems in Canada The State of the System issues a clarion call for more responsive engaged and accountable public schools

Costly Fix Ian Thomas Urquhart, 2018-01-01 Costly Fix addresses core questions about the Alberta oil sands boom that started in the 1990s Why did this flood of investment pour into the oil sands of northern Alberta What role has government played with respect to the oil sands rush and why Who benefited and who or what has paid the costs of exploiting the oil sands By analyzing the interest ideas and institutions involved in the oil sands boom Ian Urquhart charts its development from the beginning to the present In this process we learn about the state's role in making the oil sands profitable the environmental dimensions of oil sands development and First Nations roles in both opposing and supporting the industry The final chapter examines the extent to which Alberta's new NDP government in its first eighteen months altered the legacies they inherited from the Progressive Conservatives on royalties tailings reservoirs and climate change

Wild at Heart Alice Outwater, 2019-04-02 Alice

Outwater's infectiously readable *Wild at Heart* captures the essence of ecology. Everything is connected and every connection leads to ourselves. Alan Weisman, author of *The World Without Us* and *Countdown*, a wonderful book. Information rich to say the least and the indigenous human connections and portrait of the deep connectivity of nature are both strong elements. Jim McClintock, author of *A Naturalist Goes Fishing*, *Nature on the Brink*. Maybe not. With so much bad news in the world, we forget how much environmental progress has been made. In a narrative that reaches from Native American tribal practices to public health and commercial hunting, *Wild at Heart* shows how western attitudes towards nature have changed dramatically in the last five hundred years. The Chinook gave thanks for King Salmon's gifts. The Puritans saw Nature as a frightening wilderness full of uncooked meat. With the industrial revolution, nature was despoiled and simultaneously celebrated as a source of the sublime. With little forethought and great greed, Americans killed the last passenger pigeon, wiped out the old growth forests, and dumped so much oil in the rivers that they burst into flame. But in the span of a few decades, our relationship with nature has evolved to a more sophisticated sense of interdependence that brings us full circle. Across the US, people are taking individual action, planting native species, and fighting for projects like dam removal and wolf restoration. Cities are embracing nature too. Humans can learn from the past, and our choices today will determine whether nature survives. Like the First Nations, all nations must come to deep agreement that nature needs protection. This compelling book reveals both how we got here and our own and nature's astonishing ability to mutually regenerate.

A Regional Geography of the United States and Canada Lisa Benton-Short, John Rennie Short, Chris Mayda, 2018-07-25. Now in a thoroughly revised and updated edition, this text offers a comprehensive examination of North America's physical and human geography, weaving in the key themes of environment and sustainability throughout. The authors explore the challenges each region faces, such as water shortages, climate change, increased migration, and diversity, urbanization, and continued economic changes. The book also highlights the positive actions that Americans and Canadians are taking to move toward a more sustainable future. New features in the second edition include sections on population, immigration, and diversity, and urban trends. Each chapter also features a case study that examines a national park representing natural and cultural heritage, how the region is coping with climate change, how geospatial technologies are applied to environmental challenges, iconic images and/or cultural festivals, urban sustainability, best practices, and global connections and networks. Designed for ease of teaching and learning, the book features full-color photographs and maps throughout. Chapter highlights, lists of key terms, places, and major cities for each chapter, discussion questions, and a glossary.

Oil Gavin Bridge, Philippe Le Billon, 2017-06-05. Oil pulses through our daily lives. It is the plastic we touch, the food we eat, and the way we move. Oil politics in the twentieth century was about the management of abundance, state power, and market growth. The legacy of this age of plenty includes declining conventional oil reserves, volatile prices, climate change, and enduring poverty in many oil-rich countries. The politics of oil are now at a turning point, and its future will not be like its past. In this in-depth primer to one

of the world's most significant industries authors Gavin Bridge and Philippe Le Billon take a fresh look at the contemporary political economy of oil. Going beyond simple assertions of peak oil and an oil curse they point to an industry reordered by global shifts in demand toward Asia growing reliance on unconventional reserves international commitments to reduce carbon emissions a growing campaign for fossil fuel divestment and violent political struggles in many producer states. As a new geopolitics of oil emerges the need for effective global oil governance becomes imperative. Highlighting the growing influence of civil society and attentive to the efforts of firms and states to craft new institutions this fully updated second edition identifies the challenges and opportunities to curtail price volatility curb demand and the growth of dirty oil decarbonize energy systems and improve governance in oil producing countries. The Farmers' Advocate and Home Magazine, 1908

Art of Sharing Mary Janigan, 2020-07-23 In 1957 after a century of scathing debates and threats of provincial separation Ottawa finally tackled the dangerous fiscal inequalities among its richer and poorer provinces. Equalization grants allowed the poorer provinces to provide relatively equal services for relatively equal levels of taxation. The Art of Sharing tells the dramatic history of Canada's efforts to save itself. The introduction of federal equalization grants was controversial and wealthier provinces such as Alberta wanting to keep more of their taxpayers' money for their own governments continue to attack them today. Mary Janigan argues that the elusive ideal of fiscal equity in spite of dissent from richer provinces has helped preserve Canada as a united nation. Janigan goes back to Confederation to trace the escalating tensions among the provinces across decades as voters demanded more services to survive in a changing world. She also uncovers the continuing contacts between Canada and Australia as both dominions struggled to placate disgruntled member states and provinces that blamed the very act of federation for their woes. By the mid twentieth century trapped between the demands of social activists and Quebec's insistence on its right to run its own social programs Ottawa adopted non conditional grants in compromise. The history of equalization in Canada has never been fully explored. Introducing the idealistic Canadians who fought for equity along with their radically different proposals to achieve it. The Art of Sharing makes the case that a willingness to share financial resources is the real tie that has bound the federation together into the twenty first century.

Substances, Welfare, and Social Relations Amber Gazso, 2023-11-30 Substances Welfare and Social Relations uses intimate complex portraits to tell the stories of people who have lived some part of their life course while using or recovering from using substances such as alcohol or illicit or prescription drugs and also being part of a family and experiencing poverties. Through these multifaceted stories layered with a critical analysis of welfare policy the book probes the deeply entrenched stigma of living with addiction and in low income. Amber Gazso's work revolves around the three principles idea that 1 addiction is part of everyday life 2 if we believe that people are not their addictions then stigmatizing addiction has no place in society and 3 destigmatizing addiction and providing better more imaginative programs and services invites and supports actionable hope. Reflecting on qualitative data both narrative interviews and

policy discourse Substances Welfare and Social Relations illuminates how stigmas can be overturned through a collective praxis of hope
