Berkowitz, Charles H. Nilon, Karen S. Hollweg, 2006-05-29 Nowhere on Earth is the challenge for ecological understanding greater and yet more urgent than in those parts of the globe where human activity is most intense: cities. People need to understand how cities work as ecological systems so they can take control of the vital links between human actions and environmental quality and work for an ecologically and economically sustainable future. An ecosystem approach integrates biological, physical, and social factors and embraces historical and geographical dimensions, providing our best hope for coping with the complexity of cities. This book is a first-of-its-kind effort to bring together leaders in the biological, physical, and social dimensions of urban ecosystem research with leading education researchers, administrators, and practitioners to
