Emergency Stephen J. Collier, Andrew Lakoff, 2021-11-30 In the middle decades of the twentieth century in the wake of economic depression war and in the midst of the Cold War an array of technical experts and government officials developed a substantial body of expertise to contain and manage the disruptions to American society caused by unprecedented threats Today the tools invented by these mid twentieth century administrative reformers are largely taken for granted assimilated into the everyday workings of government As Stephen Collier and Andrew Lakoff argue in this book the American government's current practices of disaster management can be traced back to this era Collier and Lakoff argue that an understanding of the history of this initial formation of the emergency state is essential to an appreciation of the distinctive ways that the U S government deals with crises and emergencies or fails to deal with them today This book focuses on historical episodes in emergency or disaster planning and management Some of these episodes are well known and have often been studied while others are little remembered today The significance of these planners and managers is not that they were responsible for momentous technical innovations or that all their schemes were realized successfully Their true significance lies in the fact that they formulated a way of understanding and governing emergencies that has come to be taken for granted *Catalog of Federal Domestic Assistance*, 2000 Identifies and describes specific government assistance opportunities such as loans grants counseling and procurement contracts available under many agencies and programs
