Objective Questions

Oxidation, Reduction

- H_2O_2 reduces MnO_4^- ion to [KCET (Med.) 2000]
 - Mn^{2+}
 - Mn^{3+}
 - Mn^{2+}
 - Mn^{+}
- When a sulphur atom becomes a sulphide ion [AMU 1999]
 - There is no change in the composition of atom
 - It gains two electrons
 - The mass number changes
 - None of these
- The ultimate products of oxidation of most of hydrogen and carbon in food stuffs are [DCE 2001]
 - H_2O alone
 - CO_2 alone
 - H_2O and CO_2
 - None of these
- When P reacts with caustic soda, the products are PH_3 and NaH_2PO_2 . This reaction is an example of [IIT 1980; Kurukshetra CEE 1993; CPMT 1997]
 - Oxidation
 - Reduction
 - Oxidation and reduction (Redox)
 - Neutralization
- Which one of the following does not get oxidised by bromine water [MP PET/PMT 1985]
 - Fe^{2+} to Fe^{3+}
 - Cl^{-} to Cl^{+}
 - Mn^{2+} to MnO_4^-
 - S_n^{2-} to S_n^{+}
- In the reaction $H_2S + NO_3^- \rightarrow H_2O + NO + S$, H_2S is
 - Oxidised
 - Reduced
 - Precipitated
 - None of these
- The conversion of FeO_2 to $Fe(NO_3)_2$ is
 - Oxidation
 - Reduction
 - Neither oxidation nor reduction
 - Both oxidation and reduction
- In the course of a chemical reaction an oxidant [MP PMT 1986]
 - Loses electrons
 - Gains electrons
 - Both loses and gains electron
 - Electron change takes place
- $2Cu \rightarrow Cu + Cu_2$, the reaction is [RPMT 1997]
 - Redox
 - Neutralisation
 - Oxidation
 - Reduction
- H_2S reacts with halogens, the halogens [IPMER 2000]
 - Form sulphur halides
 - Are oxidised
 - Are reduced
 - None of these
- H_2O_2 reduces $K_2Fe(CN)_6$ [MP PMT 1985]
 - In neutral solution
 - In acidic solution
 - In non-polar solvent
 - In alkaline solution
- Max. number of moles of electrons taken up by one mole of NO_2^- when it is reduced to [DPMT 2002]
 - NH_3
 - NH_4OH
 - NO
 - NO_2
- In the reaction $3Mg + N_2 \rightarrow Mg_3N_2$ [MP PMT 1999]
 - Magnesium is reduced
 - Magnesium is oxidized
 - Nitrogen is oxidized
 - None of these
- When sodium metal is dissolved in liquid ammonia, blue colour solution is formed. The blue colour is due to [NCERT 1981]
 - Solvated Na^+ ions
 - Solvated electrons
 - Solvated NH_4^+ ions
 - Solvated protons
- Following reaction describes the rusting of iron $4Fe + 3O_2 \rightarrow 4Fe^{2+} + 6O^{2-}$. Which one of the following statement is incorrect [NCERT 1981; MNR 1991; AIIMS 1995]
 - This is an example of a redox reaction
 - Metallic iron is reduced to Fe^{2+}
 - Fe^{2+} is an oxidising agent
 - Metallic iron is a reducing agent
- $SrCl_2$ gives a precipitate with a solution of H_2Cl_2 . In this process H_2Cl_2 is [CPMT 1983]
 - Reduced
 - Oxidised
 - Converted into a complex compound containing both Sr and H_2
 - Converted into a chloro complex of H_2
- Oxidation involves [NCERT 1971, 81; CPMT 1980, 82, 83; MP PMT 1983]
 - Loss of electrons
 - Gain of electrons
 - Increase in the valency of negative part
 - Decrease in the valency of positive part
- Incorrect statement regarding rusting is [MP PET 2000]
 - Metallic iron is oxidised to Fe^{2+} ions
 - Metallic iron is reduced to Fe^{2+} ions
 - Oxygen gas is reduced to oxide ion
 - Yellowish – brown product is formed
- When copper turnings are added to silver nitrate solution, a blue coloured solution is formed after some time. It is because, copper [CPMT 1974, 79; DPMT 200]
 - Displaces silver from the solution

The American Psychiatric Association Practice Guidelines for the Psychiatric Evaluation of Adults, Third Edition American Psychiatric Association, 2015-07-29 Since the publication of the Institute of Medicine IOM report Clinical Practice Guidelines We Can Trust in 2011 there has been an increasing emphasis on assuring that clinical practice guidelines are trustworthy developed in a transparent fashion and based on a systematic review of the available research evidence To align with the IOM recommendations and to meet the new requirements for inclusion of a guideline in the National Guidelines Clearinghouse of the Agency for Healthcare Research and Quality AHRQ American Psychiatric Association APA has adopted a new process for practice guideline development Under this new process APA s practice guidelines also seek to provide better clinical utility and usability Rather than a broad overview of treatment for a disorder new practice guidelines focus on a set of discrete clinical questions of relevance to an overarching subject area A systematic review of evidence is conducted to address these clinical questions and involves a detailed assessment of individual studies The quality of the overall body of evidence is also rated and is summarized in the practice guideline With the new process recommendations are determined by weighing potential benefits and harms of an intervention in a specific clinical context Clear concise and actionable recommendation statements help clinicians to incorporate recommendations into clinical practice with the goal of improving quality of care The new practice guideline format is also designed to be more user friendly by dividing information into modules on specific clinical questions Each module has a consistent organization which will assist users in finding clinically useful and relevant information quickly and easily This new edition of the practice guidelines on psychiatric evaluation for

adults is the first set of the APA's guidelines developed under the new guideline development process. These guidelines address the following nine topics in the context of an initial psychiatric evaluation: review of psychiatric symptoms, trauma history, and treatment history; substance use assessment; assessment of suicide risk; assessment for risk of aggressive behaviors; assessment of cultural factors; assessment of medical health; quantitative assessment of involvement of the patient in treatment decision making; and documentation of the psychiatric evaluation. Each guideline recommends or suggests topics to include during an initial psychiatric evaluation. Findings from an expert opinion survey have also been taken into consideration in making recommendations or suggestions. In addition to reviewing the available evidence on psychiatry evaluation, each guideline also provides guidance to clinicians on implementing these recommendations to enhance patient care.

Comprehensive Handbook of Personality and Psychopathology, Child Psychopathology Robert T. Ammerman, 2006-01-03

Child Psychopathology presents an overview of the classification and diagnosis, genetic, sociological, and neuropsychiatric influences, and research and behavioral considerations of psychopathology in infants and children. This state-of-the-art volume also includes the latest research on the major childhood disorders and discusses the three most popular treatment approaches.

Pediatric Critical Care Steven E. Lucking, Frank A. Maffei, Robert F. Tamburro, Arno Zaritsky, 2021-03-15

This extensively updated textbook is a comprehensive study guide that covers pediatric critical care principles and specific disease entities commonly encountered by the pediatric critical care medicine (PCCM) practitioner. Pathophysiologic aspects unique to the pediatric patient are emphasized. The first edition has become a highly utilized text for pediatric critical care fellows. The second edition will prove even more valuable to the fellow in training and indeed to any clinical pediatric intensivist. In addition to updating the chapters from the previous edition, there are new chapters on topics such as central nervous system structure and function, palliative care, child abuse, and practical biostatistics. Pediatric Critical Care Text and Study Guide is an invaluable clinically focused resource for PCCM practitioners. Allowing for concise reading on specific topics, this book acts as both text and study guide, covering advanced physiology, pathophysiology, diagnostic considerations, and treatment approaches that should be mastered by the higher-level PCCM practitioner. The large number of illustrations complements the text in each chapter, that also includes key references and case-oriented questions that help reinforce important ideas learned in the chapter.

Wildfire Risk Wade E. Martin, Carol Raish, Brian Kent, 2010-09-30

The continuing encroachment of human settlements into fire-prone areas and extreme fire seasons in recent years make it urgent that we better understand both the physical and human dimensions of managing the risk from wildfire. Wildfire Risk follows from our awareness that increasing public knowledge about wildfire hazard does not necessarily lead to appropriate risk reduction behavior. Drawing heavily upon health and risk communication and risk modeling, the authors advance our understanding of how individuals and communities respond to wildfire hazard. They present results of original research on the social, economic, and psychological factors in responses to risk, discuss how outreach and education can influence

behavior and consider differences among ethnic racial groups and between genders with regard to values views and attitudes about wildfire risk They explore the role of public participation in risk assessment and mitigation as well as in planning for evacuation and recovery after fire Wildfire Risk concludes with a dedicated section on risk modeling with perspectives from decision sciences geography operations research psychology experimental economics and other social sciences **How to**

Advances in Virtual Agents and Affective Computing for the Understanding and Remediation of Social Cognitive Disorders Eric Brunet-Gouet, Ali Oker, Jean-Claude Martin, Ouriel Grynszpan, Philip L. Jackson, 2016-03-02

Advances in modern sciences occur thanks to within fields discoveries as well as confrontation of concepts and methods from separated sometimes distant domains of knowledge For instance the fields of psychology and psychopathology benefited from accumulated contributions from cognitive neurosciences which in turn received insights from molecular chemistry cellular biology physics neuroimaging statistics and computer sciences data processing etc From the results of these researches one can argue that among the numerous cognitive phenomena supposedly involved in the emergence the human intelligence and organized behavior some of them are specific to the social nature of our phylogenetic order Scientific reductionism allowed to divide the social cognitive system into several components i e emotion processing and regulation mental state inference theory of mind agency etc New paradigms were progressively designed to investigate these processes within highly controlled laboratory settings Moreover the related constructs were successful at better understanding psychopathological conditions such as autism and schizophrenia with partial relationships with illness outcomes Here we would like to outline the parallel development of concepts in social neurosciences and in other domains such as computer science affective computing virtual reality development and even hardware technologies While several researchers in neurosciences pointed out the necessity to consider naturalistic social cognition Zaki and Ochsner *Ann N Y Acad Sci* 1167 16 30 2009 the second person perspective Schilbach et al *Behav Brain Sci* 36 4 393 414 2013 and reciprocity de Bruin et al *Front Hum Neurosci* 6 151 2012 both computer and software developments allowed more and more realistic real time models of our environment and of virtual humans capable of some interaction with users As noted at the very beginning of this editorial a new convergence between scientific disciplines might occur from which it is tricky to predict the outcomes in terms of new concepts methods and uses Although this convergence is motivated by the intuition that it fits well ongoing societal changes increasing social demands on computer technologies augmenting funding it comes with several difficulties for which the current *Frontiers* in topic strives to bring some positive answers and to provide both theoretical arguments and experimental examples The first issue is about concepts and vocabulary as the contributions described in the following are authored by neuroscientists computer scientists psychopathologists etc A special attention was given during the reviewing process to stay as close as possible to the publication standards in psychological and health sciences and to avoid purely technical descriptions The second problem concerns methods more complex computerized interaction models results in unpredictable

and poorly controlled experiments In other words the assets of naturalistic paradigms may be alleviated by the difficulty to match results between subjects populations conditions Of course this practical question is extremely important for investigating pathologies that are associated with profoundly divergent behavioral patterns Some of the contributions of this topic provide description of strategies that allowed to solve these difficulties at least partially The last issue is about heterogeneity of the objectives of the researches presented here While selection criteria focused on the use of innovative technologies to assess or improve social cognition the fields of application of this approach were quite unexpected In an attempt to organize the contributions three directions of research can be identified 1 how innovation in methods might improve understanding and assessment of social cognition disorders or pathology 2 within the framework of cognitive behavioral psychotherapies CBT how should we consider the use of virtual reality or augmented reality 3 which are the benefits of these techniques for investigating severe mental disorders schizophrenia or autism and performing cognitive training The first challenging question is insightfully raised in the contribution of Timmermans and Schilbach 2014 giving orientations for investigating alterations of social interaction in psychiatric disorders by the use of dual interactive eye tracking with virtual anthropomorphic avatars Joyal Jacob and collaborators 2014 bring concurrent and construct validities of a newly developed set of virtual faces expressing six fundamental emotions The relevance of virtual reality was exemplified with two contributions focusing on anxiety related phenomena Jackson et al 2015 describe a new environment allowing to investigate empathy for dynamic FACS coded facial expressions including pain Based on a systematic investigation of the impact of social stimuli modalities visual auditory Ruch and collaborators are able to characterize the specificity of the interpretation of laughter in people with gelotophobia 2014 On the issue of social anxiety Aymerich Franch et al 2014 presented two studies in which public speaking anxiety has been correlated with avatars similarity of participants self representations The second issue focuses on how advances in virtual reality may benefit to cognitive and behavioral therapies in psychiatry These interventions share a common framework that articulates thoughts feelings or emotions and behaviors and proposes gradual modification of each of these levels thanks to thought and schema analysis stress reduction procedures etc They were observed to be somehow useful for the treatment of depression stress disorders phobias and are gaining some authority in personality disorders and addictions The main asset of new technologies is the possibility to control the characteristics of symptom eliciting stimuli situations and more precisely the degree to which immersion is enforced For example Baus and Bouchard 2014 provide a review on the extension of virtual reality exposure based therapy toward recently described augmented reality exposure based therapy in individuals with phobias Concerning substance dependence disorders Hone Blanchet et collaborators 2014 present another review on how virtual reality can be an asset for both therapy and craving assessment stressing out the possibilities to simulate social interactions associated with drug seeking behaviors and even peers pressure to consume The last issue this Frontiers topic deals with encompasses the questions raised by social

cognitive training or remediation in severe and chronic mental disorders autistic disorders schizophrenia Here therapies are based on drill and practice or strategy shaping procedures and most of the time share an errorless learning of repeated cognitive challenges Computerized methods were early proposed for that they do effortlessly and with limited costs repetitive stimulations While repetition was incompatible with realism in the social cognitive domain recent advances provide both immersion and full control over stimuli Georgescu and al 2014 exhaustively reviews the use of virtual characters to assess and train non verbal communication in high functioning autism HFA Grynszpan and Nadel 2015 present an original eye tracking method to reveal the link between gaze patterns and pragmatic abilities again in HFA About schizophrenia Oker and collaborators 2015 discuss and report some insights on how an affective and reactive virtual agents might be useful to assess and remediate several defects of social cognitive disorders About assessment within virtual avatars on schizophrenia Park et al 2014 focused on effect of perceived intimacy on social decision making with schizophrenia patients Regarding schizophrenia remediation Peyroux and Franck 2014 presented a new method named RC2S which is a cognitive remediation program to improve social cognition in schizophrenia and related disorders To conclude briefly while it is largely acknowledged that social interaction can be studied as a topic of its own all the contributions demonstrate the added value of expressive virtual agents and affective computing techniques for the experimentation It also appears that the use of virtual reality is at the very beginning of a new scientific endeavor in cognitive sciences and medicine

Evidence-Based

Practice Manual Albert R. Roberts, Kenneth R. Yeager, 2004-01-15 The Evidence Based Practice Manual was developed as an all inclusive and comprehensive practical desktop resource It includes 104 original chapters each specially written by the most prominent and experienced medical public health psychology social work criminal justice and public policy practitioners researchers and professors in the United States and Canada This book is specifically designed with practitioners in mind providing at a glance overviews and direct application chapters This is the only interdisciplinary volume available for locating and applying evidence based assessment measures treatment plans and interventions Particular attention has been given to providing practice guidelines and exemplars of evidence based practice and practice based research The Evidence Based Practice Manual emphasizes and summarizes key elements issues concepts and how to approaches in the development and application of evidence based practice Discussions include program evaluation quality and operational improvement strategies research grant applications validating measurement tools and utilizing statistical procedures Concise summaries of the substantive evidence gained from methodologically rigorous quantitative and qualitative research provide make this is an accessible resource for a broad range of practitioners facing the mandate of evidence based practice in the health and human services
