These tracts come from a variety of
locations in the brain, as a group are
termed the "extra-pyramidal tracts",
and are generally associated with
balance and muscle tone.

The corticospinal tracts carry voluntary
motor stimuli from the cerebral cortex to
motor neurons in the spinal cord. They are
also called the "pyramidal tracts" because
some of them cross in the pyramids of the
medulla.

From the spinal cord to the cerebellum.
Carry subconscious proprioceptive stimuli.
Proprioception is "body sense" and "muscle
sense", the perception of body position and
muscle position necessary for coordinating
movements.
