Winner of the Phyllis Goodhart Gordan Book Prize by the Renaissance Society of America and the Leo Gershoy Prize by the American Historical Association. Shortlisted for the Jon Ben Snow Prize by the North American Conference of British Studies. Many accounts of the scientific revolution portray it as a time when scientists disciplined knowledge by first disciplining their own behavior. According to these views, scientists such as Francis Bacon produced certain knowledge by pacifying their emotions and concentrating on method. In *The Interlopers*, Vera Keller rejects this emphasis on discipline and instead argues that what distinguished early modernity was a navigation away from restraint and toward the violent blending of knowledge from across society and around the globe. Keller follows early seventeenth-century English projectors as they traversed the world pursuing outrageous entrepreneurial schemes along the way. These interlopers were developing a different culture of knowledge, one that aimed to take advantage of the disorder created by the rise of science and technological advances. They sought to deploy the first submarine in the Indian Ocean, raise silkworms in Virginia, and establish the English slave trade. These projectors developed a culture of extreme risk-taking, uniting global capitalism with martial values of violent conquest. They saw the world as a riskscape of empty spaces, disposable people, and unlimited resources. By analyzing the disasters as well as a few successes of the interlopers, she studies Keller's new interpretation of the nature of early modern knowledge itself. While many influential accounts of the period characterize European modernity as a disciplining or civilizing process, *The Interlopers* argues that early modernity instead entailed a great undisciplining that entangled capitalism, colonialism, and science. **SHORT STORIES FOR STUDENTS** CENGAGE LEARNING. The Interloper Michel Anteby, 2024-04-09 A practical and theoretical guide for field researchers struggling with access Resistance is the bane of all field researchers who are often viewed as interlopers when they enter a community and start asking questions People obstruct investigations and hide evidence They shelve complaints silence dissent and even forget their own past and deny having done so How can we learn about a community when its members resist so strongly The answer is that the resistance itself is sometimes the key Michel Anteby explains how community members often disclose more than intended when they close ranks and create obstacles He draws insights from diverse stories of resistance by uncooperative participants from Nazi rocket scientists and Harvard professors to Disney union busters and people who secure cadavers for medical school dissection to reveal how field resistance manifests itself and how researchers can learn from it He argues that many forms of resistance are retrospectively telling and that these forms are the routine products not by products of the field That means that resistance mechanisms are not only indicative of something else happening instead they often are the very data points that can shed light on how participants make sense of their worlds An essential guide for ethnographers sociologists and all field researchers seeking access The Interloper shares practical and theoretical insights into the value of having the door slammed in your face
