The Best Weapon A World Apparent Tale:

The Tale of the Next Great War, 1871-1914 I. F. Clarke, 1995-11-01 This selection of short stories offers a return journey through the future as it used to be Time speeds backwards to the 1870s to the alpha point of modern futuristic fiction the opening years of that enchanted period before the First World War when Jules Verne H G Wells and many able writers delighted readers from Sydney to Seattle with their most original revelations of things to come In all their anticipations the dominant factor was the recognition that the new industrial societies would continue to evolve in obedience to the rate of change One major event that caused all to think furiously about the future was the Franco German War of 1870 The new weapons and the new methods of army organization had shown that the conduct of warfare was changing and in response to that perception of change a new form of fiction took on the task of describing the conduct of the war to come Stories Make the World Stephen Most, 2025-06-01 Since the beginning of human history stories have helped people make sense of their lives and their world Today an understanding of storytelling is invaluable as we seek to orient ourselves within a flood of raw information and an unprecedented variety of supposedly true accounts In Stories Make the World award winning screenwriter Stephen Most offers a captivating refreshingly heartfelt exploration of how documentary filmmakers and other storytellers come to understand their subjects and cast light on the world through their art Drawing on the author's decades of experience behind the scenes of television and film documentaries this is an indispensable account of the principles and paradoxes that attend the quest to represent reality truthfully The Story of the Guns Sir James Emerson Tennent, 1864
