The Boundary Panic:

The Boundaries of Desire Eric Berkowitz, 2015-08-01 The act of reproduction and its variants never change much but our ideas about the meaning of sex are in constant flux Switch a decade cross a border or traverse class lines and the harmless pleasures of one group become the gravest crimes in another Combining meticulous research and lively storytelling *The Boundaries of Desire* traces the fast moving bloodsport of sex law over the past century and challenges our most cherished notions about family power gender and identity Starting when courts censored birth control information as pornography and let men rape their wives and continuing through the sexual revolution and into the present day when rape gay rights sex trafficking and sex on the internet saturate the news Berkowitz shows how the law has remained out of synch with the convulsive changes in sexual morality By focusing on the stories of real people Berkowitz adds a compelling human element to what might otherwise be faceless legal battles The law is made by people after all and nothing sparks intolerance on the left and right more than sex Ultimately Berkowitz shows the emptiness of sanctimonious condemnation and argues that sexual questions are too subtle and volatile for simple catch all solutions *Proceedings Of The Xiv International Grassland Congress* J. Allan Smith, Virgil M. Hays, 2019-09-16 Approximately 1500 scientists from around the globe participated in the International Grassland Congress at the University of Kentucky in 1981 sharing existing knowledge of grasslands and exploring methods for increasing the productivity of livestock forage systems so as to better feed mankind while maintaining or improving environmental quality Of the nearly 500 papers presented on previously unpublished original research or experimental research and development projects 273 were selected for inclusion in this book They cover the current basic and applied research on production and utilization of forages from grasslands the world over

Shakespeare's Body Language Miranda Fay Thomas, 2019-11-14 Why do the Capulets bite their thumbs at the Montagues Why do the Venetians spit upon Shylock's Jewish gaberdine What is it about Volturnus's act of kneeling that convinces Coriolanus not to assault the city of Rome Shakespeare's Body Language is a ground breaking new study of Shakespearean drama revealing the previously unseen history of social tensions found within the performance of gestures and how such gestures are used to shame those within the body politic of early modern England The first full study of shaming gestures in Shakespearean drama this book establishes how shame is often rooted in the gendered expectations of the Renaissance era Exploring how the performance of gestures such as figging the cuckold's horns and even the inaction of stillness created shaming spectacles on the early modern stage and its wider society Shakespeare's Body Language argues that gestures are embodied social metaphors which epitomise the personal as political It reveals the tensions of everyday life as key motivators behind the actions of Shakespeare's characters and considers how honour and its opposite shame are constructed in terms of gender norms Featuring in depth analyses of plays across Shakespeare's career this book explores how the playwright's understanding of shame and humiliation is rooted in performance anxiety and gender politics explaining

how theatrical gestures can create dramatic tension in a way that words alone cannot. It offers both rich insights into the early modern context of Shakespeare's drama and confirms the startling relevance of his work to modern audiences.

Oxford Handbook of Anxiety and Related Disorders Martin M. Antony, Murray B. Stein, 2009 This handbook reviews research and clinical developments through synthetic chapters written by experts from various fields of study and clinical backgrounds. It discusses each of the main anxiety disorders and examines diagnostic criteria, prevalence rates, comorbidity, and clinical issues.

Subjectivities, Knowledges, and Feminist Geographies Liz Bondi, 2002 Research about people always makes assumptions about the nature of humans as subjects. This collaboration by a group of feminist researchers looks at subjectivity in relation to researchers, the researched, and audiences as well as at the connections between subjectivity and knowledge. The authors argue that subjectivity is spatialized in embodied, multiple, and fractured ways, challenging the dominant notions of the rational, bounded subject. A highly original contribution to feminist geography, this book is equally relevant to social science debates about using qualitative methodologies and to ongoing discussions on the ethics of social research.

Oahspe John Ballou Newbrough, 1882 The Boundaries of the Criminal Law R. A. Duff, Lindsay Farmer, S. E. Marshall, Massimo Renzo, Victor Tadros, 2010-11-11 Criminalization is a new series arising from an interdisciplinary investigation into criminalization, focussing on the principles and goals that should guide decisions about what kinds of conduct are to be criminalized and the forms that criminalization should take. Developing a normative theory of criminalization, the six volumes will tackle the key questions at the heart of the issue. By reference to what principles and goals should legislations decide what to criminalize. How should criminal wrongs be classified and differentiated? And how should law enforcement officials apply the law's specification of offences? *Boundaries of the Criminal Law* is the first book in this series, examining the scope and boundaries of the criminal law. Investigations into the scope of the criminal law have often focused on the harm principle, the principle that conduct can be justifiably criminalized only if it is harmful, or other master principles that might determine the proper scope of the criminal law. This collection of original essays by some of the leading scholars in criminal law and philosophy from the UK and the US makes significant advances in the development of a broader range of ideas that might inform criminalization decisions. A range of issues are discussed, including the significance for criminalization of ideas of moral wrongdoing and of using a person as a means, the distinction between criminal law and other forms of legal regulation, the role of new technology in our understanding of the evolving scope of the criminal law, and the role of criminal justice officials in decision making about criminalization. The authors draw on legal and philosophical sources, but also on history, sociology, and social psychology in their investigations for a truly interdisciplinary approach. This is a groundbreaking set of essays which will help to reorient legal and philosophical discussion about the proper scope of the criminal law.
