Blackwell Encyclopedia of Writing Systems Florian Coulmas, 1996-06-10 This is an encyclopedia of writing systems scripts and orthographies of all the world's major languages past and present. It provides both a fully illustrated description of over 400 writing systems and an account of the study of writing in many different disciplines from anthropology to psychology. Entries in this encyclopedia describe how writing systems evolved, how they work, and how they differ from each other. They deal with technical aspects such as handwriting, printing, word processing, with practical problems of decipherment, alphabet making, and spelling reform, and with theoretical questions such as the functions of writing and the typology of writing systems. Florian Coulmas starts from the view that writing reflects a process of linguistic analysis. Yet he ranges widely among different scientific disciplines. He draws on historical and paleographic research into fundamental structural options of representing language by means of a graphic code, on psychological investigation into the social conditions and consequences of literacy. Entries vary between short explanations of terms and concepts, brief accounts of individual writing systems, and longer theoretical articles. The encyclopedia contains an exceptional array of visual examples and is supported by a comprehensive bibliography.

Writing Systems Florian Coulmas, 2003 During its long history, the problem of reducing language to writing and conversely that of interpreting written signs as language has found a variety of solutions which still exist in the form of different writing systems. Written by a leading expert, this new textbook provides an accessible introduction to the major writing systems of the world from cuneiform to English spelling. Florian Coulmas presents detailed descriptions of the world's writing systems and explains their structural complexities as well as the intricate relationship between written and spoken language. The book also provides a clear and engaging account of the history of writing and its consequences for human thought and literate society. This illustrated textbook includes questions for discussion at the end of each chapter and an up-to-date explanation of theoretical issues. Clearly organised and engagingly written, it is the ideal textbook for use on courses on writing systems.
