

- Start the engine and raise the revolutions to more than 8 000 — 8 500 rpm and check that the actuator pulley returns to the full open position where the pulley's index line ③ is pointing the line ②. With the actuator held in this position, check the exhaust valve pulley position. The exhaust valve pulley index line ⑤ should be approximately at the line ④.

NOTE:

The actuator stops and holds the current pulley position the moment the ignition switch is turned off. This feature may be used for facilitating the pulley alignment inspection procedure.

ACTUATOR CABLE ADJUSTMENT

- Verify that the actuator pulley adjustment is properly made.
- Verify that the oil pump cable is properly adjusted relative to the throttle cable (adjusted at the 1/2 opening).
- Verify that the throttle cable is not tensioned.
- Turn the actuator cable adjuster ① to pull the cable and stop it at the position where the oil pump cable pulley ② begins to move. At this position, set the actuator cable adjuster and tighten the lock nut.

CAUTION:

This adjustment must be made when the junction box is positioned in the actual location.

NOTE:

Actuator cable play: 0 mm (0 in.)
