The book begins with the definition of community science, and the following chapters introduce monitoring in ecological community science using various methods such as observation, specimens, photographs, videos, sounds, and environmental DNA. Readers can learn about the advantages and disadvantages of these methods in ecological community science monitoring. The book also covers topics such as scientific communication, data obtained from ecological community science monitoring, the rights of participants, decision-making in community science, and conservation activities with volunteers such as invasive alien species extermination and nature restoration.
