Charlie Parker, Composer Henry Martin, 2020 *Charlie Parker Composer* is the first assessment of a major jazz composer's oeuvre in its entirety Providing analytical discussion of each of Parker's works this study combines music theoretical historical and philosophical perspectives A variety of analytical techniques are brought to bear on Parker's compositions including application of a revised Schenkerian approach to the music that was developed through the author's prior publications After a review of Parker's life emphasizing his musical training and involvement in composition the book proceeds by considering the types of Parker pieces as categorized by overall form and harmony and the amount of preplanned music they contain The historical circumstances of each piece are reviewed and in some cases sources of the ideas of the most important tunes are explored The introduction includes a discussion of the ontology of a jazz composition The view is advanced that the Western concept of a music composition needs to be expanded to embrace practices typical of jazz composition and forming a significant part of Parker's work While focusing on Parker's more conventional tunes the book also considers his large scale melodic formulas Two formulas in particular are arguably compositional since they are repeated in subsequent performances of the same piece As part of the research for this book all of Parker's copyright submissions to the Library of Congress were examined and photographed The book reproduces the four of them that were

copied by Parker himself **Backtime Religion in the Danish West Indies** Gregory Carter, 2025-10-30 During the era of slavery in the Danish West Indies a distinct Africana heritage religion was developed by the enslaved population that relied on performative expression and Gregory Carter traces this heritage This spirituality shared many attributes with other African heritage religions throughout the African Atlantic including belief in spirit powers the veneration of ancestors polyrhythmic music dance costumed masquerade performance reliance on herbalism and spirit mediumship Simultaneously they also incorporated Evangelical Lutheran Moravian Christianity and the practice of altaration Backtime Religion in the Danish West Indies Africana Heritage Religion Beyond Obeah contends that the altaration of the human body is key to conceptualizing how enslaved Africans and their descendants contended with the terrible conditions inherent to slavery the dislocation of spiritual connections from Africa and built a renewed and living spiritual understanding on the Danish islands To prevent loss of cultural knowledge and spirituality the Danish West Indian enslaved community adapted to life on the islands with immediate pragmatism and took in every available means to regain connection to spiritual power available containing and hiding this spirituality within living human bodies Through in depth research Carter provides insight into how this religious practice African heritage and culture continue to impact the present day Virgin Islands *Arts Education*, 2023-11-09 Arts Education A Global Affair highlights the adaptations that arts educators and researchers have undertaken to successfully adjust to the changes in arts education practices as a consequence of the global pandemic and its ongoing variants Moreover teaching and research in arts education have changed significantly as a consequence of the world wide pandemic COVID 19 Emerging variants have exacerbated the situation and show no signs of subsiding In response to these challenges arts educators and researchers have developed new modes of instructional delivery and data collection These include asynchronous synchronous hybrid and bi modal online learning and online questionnaires surveys focus groups and video interviews This volume highlights the adaptations that arts educators and researchers have undertaken to successfully adjust to this new reality in education *Psychoacoustic Foundations of Major-Minor Tonality* Richard Parncutt, 2024-02-13 A fascinating interdisciplinary approach to how everyday Western music works and why the tones melodies and chords combine as they do Despite the cultural diversity of our globalized world most Western music is still structured around major and minor scales and chords Countless thinkers and scientists of the past have struggled to explain the nature and origin of musical structures In *Psychoacoustic Foundations of Major Minor Tonality* music psychologist Richard Parncutt offers a fresh take combining music theory Rameau s fundamental bass Riemann s harmonic function Schenker s hierarchic analysis Forte s pitch class set theory with psychology Bregman s auditory scene Terhardt s virtual pitch Krumhansl s tonal hierarchy Drawing on statistical analyses of notated music corpora Parncutt charts a middle path between cultural relativism and scientific positivism to bring music theory into meaningful discourse with empirical research Our musical subjectivity Parncutt explains depends on our past musical experience and hence on music history and its social contexts It also depends

on physical sound properties as investigated in psychoacoustics with auditory experiments and mathematical models Parncutt's evidence-based theory of major/minor tonality draws on his interdisciplinary background to present a theory that is comprehensive, creative, and critical. Examining concepts of interval, consonance, chord root, leading tone, harmonic progression, and modulation, he asks: Why are some scale tones and chord progressions more common than others? What aspects of major/minor tonality are based on human biology or general perceptual principles? What aspects are culturally arbitrary? And what about colonial history? Original and provocative *Psychoacoustic Foundations of Major/Minor Tonality* promises to become a foundational text in both music theory and music cognition.
