The Aral Sea Encyclopedia Igor S. Zonn, M. Glantz, Aleksey N. Kosarev, Andrey G. Kostianoy, 2009-02-08 The Aral Sea Encyclopedia is the

first one in the new series of encyclopedias about the seas of the former Soviet Union. Preparing it we faced certain difficulties. The thing is that this encyclopedia is a monument to the sea that is disappearing during our lifetime. The world community considers the situation with the Aral Sea and all changes that occurred in its whereabouts in the recent decades as one of the most serious if not disastrous anthropogenic environmental crises of the 20th century. Before 1960 this was a water abundant sea lake that was fourth among world lakes after the Caspian Sea, USSR, Iran, the Great Lakes, USA, Canada and Victoria Lake, Africa. This was a real pearl among the sands of the largest deserts, the Karakums and the Kyzylkums. Navigation between the sea ports Muinak and Aralsk and fisheries famous for the Aral breams, barbel, sturgeons, shemaya and others were developed here. One could find beautiful recreational zones and beaches here. The deltas of the Amudarya, the major river of Central Asia, and the Syrdarya bringing their waters into the Aral Sea were famous for their biodiversity, fishery, muskrat rearing, reed production. The local population found occupations related to the water infrastructure.

Lake Urmia Peygham Ghaffari, Evgeniy V. Yakushev, 2023-09-21. This book provides a holistic review of the environmental status of Lake Urmia in terms of its hydrodynamic, chemical and ecological properties. Lake Urmia is a shallow, landlocked, hypersaline water body located in the northwest part of Iran and it is known as one of the largest continental salt lakes in the world. Divided into 16 chapters, the book gathers leading experts from various scientific disciplines and it covers past and current characteristics of the lake and traces projections on how the water quantity, quality, chemical and ecological state of Lake Urmia Basin can develop in the future. The book outcomes are based on the analyses of the data of observations and unique models that were elaborated for the Lake Urmia system development studies. Particular attention is given to the basin drought in response to anthropogenic drivers and environmental pressures such as climate variability and climate change and their impact on the aquatic environment. The impact of water conveyance on Lake Urmia to improve the physical, chemical and biological natural state is also discussed in this book where an intensive and challenging observation plan in this harsh environment is combined with uniquely coupled and adopted hydrodynamical, biogeochemical models. Given its scope, the book offers an invaluable source of information for researchers, students and environmental managers interested in the Lake Urmia environment.

The Turkmen Lake Altyn Asyr and Water Resources in Turkmenistan Igor S. Zonn, Andrey G. Kostianoy, 2013-10-17. This book offers a concise description of the environment and water resources in Turkmenistan. The focus is on the water bodies of Turkmenistan: the Caspian Sea, Kara Bogaz Gol Bay, Sarykamysh Lake, Amu Darya River and the Karakum Canal. Respected experts from six different countries cover the landscape, geographical features, the Karakum Desert biodiversity, especially of birds and fishes and ecosystems, as well as regional climate change. Special attention is paid to the Altyn Asyr Lake water reclamation project, to the morphometric characteristics of the Karashor Depression and to the four year long satellite monitoring of the construction area in the vicinity of the Karashor Depression. The information presented is based on observational data and scientific literature mainly published in Russian.
