Charlie Parker, Composer Henry Martin, 2020 Charlie Parker Composer is the first assessment of a major jazz composer's oeuvre in its entirety Providing analytical discussion of each of Parker's works this study combines music theoretical historical and philosophical perspectives A variety of analytical techniques are brought to bear on Parker's compositions including application of a revised Schenkerian approach to the music that was developed through the author's prior publications After a review of Parker's life emphasizing his musical training and involvement in composition the book proceeds by considering the types of Parker pieces as categorized by overall form and harmony and the amount of preplanned music they contain The historical circumstances of each piece are reviewed and in some cases sources of the ideas of the most important tunes are explored The introduction includes a discussion of the ontology of a jazz composition The view is advanced that the Western concept of a music composition needs to be expanded to embrace practices typical of jazz composition and forming a significant part of Parker's work While focusing on Parker's more conventional tunes the book also considers his large scale melodic formulas Two formulas in particular are arguably compositional since they are repeated in subsequent performances of the same piece As part of the research for this book all of Parker's copyright submissions to the Library of Congress were examined and photographed The book reproduces the four of them that were copied by Parker himself
