Case Studies in Drowning Forensics Kevin Gannon, D. Lee Gilbertson, 2014-03-07 When a corpse is found in a body of water, authorities generally presume that the manner of death was either an accident or a suicide. They do not treat the recovery site as a potential crime scene or homicide, so many cases remain unsolved. *Case Studies in Drowning Forensics* investigates the cases of 13 bodies recovered from water in similar circumstances and one survivor. The product of intensive field investigation and archival research, this is the first book that presents and explains forensic autopsy evidence associated with the Smiley Face murders. Each chapter begins with background information on the victim in the case and discusses when and where the victim was last seen and how the body was recovered. This is followed by an in-depth analysis of the evidence found and the peculiarities of each case. Gannon and Gilbertson challenge authorities' determinations regarding cause and manner of death.

by critically examining autopsy toxicology and law enforcement reports and photographs They also reveal evidence not previously made public including search efforts cell phone records GPS data and additional drug tests Building on each successive case study they explain relationships among postmortem artifacts in a graphic format Presenting the inside truth on the circumstances and the evidence the book enables readers to determine for themselves whether the deaths of these young men were accidents or homicides
