The Bonobo Way The Evolution Of Peace Through Pleasure:

The Bonobo Way Susan Block, 2014-10-30 In this unique and paradigm changing book internationally acclaimed and controversial sex educator Dr Susan Block offers a brilliant new view of human sexuality war peace and community inspired by a role model who isn't even human our closest genetic cousin the bonobo With a provocative humorous and engaging style that makes science fun and ecology erotic *The Bonobo Way* boldly asks What do these great apes know about sex and the rest of life that we don't Here are some things we know about bonobos They have lots of sex They never kill each other They empower the females They stay younger longer They live in peace through pleasure And we thought humans were the smartest apes For decades experts have used the killer ape paradigm to explain why humans murder make war bomb and behead each other and supposedly always will Sure our common chimp cousins kill but do they tell the whole tale Luckily no *The Bonobo Way* shows the other side of the story presenting the bonobos as a new great ape paradigm for humanity that could change the world or at least improve your love life This book is really good something I rarely say these days *The Bonobo Way* is whimsical yet serious easy to read yet thoroughly researched challenging yet ultimately deeply comforting Dr Susan Block is living proof that bonobos aren't just sexy and fun some of them are damned smart too Christopher Ryan Ph D author of *Sex at Dawn* From the lush depths of the rainforest to the satin sheets of your bedroom Dr Block takes you on a fascinating journey weaving stories studies theories and fantasies into possibilities and a practical path of action presenting a very different kind of 12 Step Program to release your inner bonobo help save the real bonobos from extinction and energize all facets of your life Whether you don't know bonobos from bananas or you think you know all about these amazing creatures *The Bonobo Way* will show you the way to a happier healthier sexier life and a more peaceful sustainable culture

The Better Angels of Our Nature Steven Pinker, 2011-10-04 If I could give each of you a graduation present it would be this the most inspiring book I've ever read Bill Gates May 2017 Selected by The New York Times Book Review as a Notable Book of the Year The author of *Rationality and Enlightenment* Now offers a provocative and surprising history of violence Faced with the ceaseless stream of news about war crime and terrorism one could easily think we live in the most violent age ever seen Yet as New York Times bestselling author Steven Pinker shows in this startling and engaging new work just the opposite is true violence has been diminishing for millennia and we may be living in the most peaceful time in our species' existence For most of history war slavery infanticide child abuse assassinations programs gruesome punishments deadly quarrels and genocide were ordinary features of life But today Pinker shows with the help of more than a hundred graphs and maps all these forms of violence have dwindled and are widely condemned How has this happened This groundbreaking book continues Pinker's exploration of the essence of human nature mixing psychology and history to provide a remarkable picture of an increasingly nonviolent world The key he explains is to understand our intrinsic motives the inner demons that incline us toward violence and the better angels that steer us away and how changing circumstances have allowed our better

angels to prevail Exploding fatalist myths about humankind's inherent violence and the curse of modernity this ambitious and provocative book is sure to be hotly debated in living rooms and the Pentagon alike and will challenge and change the way we think about our society

The Domestication of Language Daniel Cloud,2014-11-25 Language did not evolve only in the distant past Our shared understanding of the meanings of words is ever changing and we make conscious rational decisions about which words to use and what to mean by them every day Applying Darwin's theory of unconscious artificial selection to the evolution of linguistic conventions Daniel Cloud suggests a new evolutionary explanation for the rich complex and continually reinvented meanings of our words The choice of which words to use and in which sense to use them is both a selection event and an intentional decision making Darwin's account of artificial selection a particularly compelling model of the evolution of words After drawing an analogy between the theory of domestication offered by Darwin and the evolution of human languages and cultures Cloud applies his analytical framework to the question of what makes humans unique and how they became that way He incorporates insights from David Lewis's Convention Brian Skyrms's Signals and Kim Sterelny's Evolved Apprentice all while emphasizing the role of deliberate human choice in the crafting of language over time His clever and intuitive model casts humans cultural and linguistic evolution as an integrated dynamic process with results that reach into all corners of our private lives and public character

The Genesis of Israel and Egypt Emmet Sweeney,2023-10-01 The Genesis of Israel and Egypt examines the earliest phase of historical consciousness in the ancient Near East looking in particular at the mysterious origins of Egypt's civilization and its links with Mesopotamia and the early Hebrews The book takes a radically alternative view of the rise of high civilization in the Near East and the forces which propelled it The author Emmet Sweeney finds that the early civilizations developed amidst a background of massive and repeated natural catastrophes events which had a profound effect upon the ancient peoples and left its mark upon their myths legends customs and religions Ideas found in all corners of the globe concepts such as dragon worship pyramid building and human sacrifice are shown by Sweeney to have a common origin in the cataclysmic events of the period termed the eruptive age by legendary English explorer Percy Fawcett Terrified and traumatized by the forces of nature people all over the world began to keep an obsessive watch on the heavens and to offer blood sacrifices to the angry sky gods These events which are fundamental to any understanding of the first literate cultures have nonetheless been completely effaced from the history books and an official history of mankind which is little more than an elaborate fiction now graces the bookshelves of the world's great libraries Starting with clues unearthed by history sleuth Immanuel Velikovsky and others Emmet Sweeney takes the investigation further While the Near Eastern civilizations are generally considered to have taken shape around 3300 BC about 2 000 years before those of China and the New World Ages in Alignment demonstrates that they had no 2 000 year head start All the ancient civilizations arose simultaneously around 1300 BC in the wake of a terrible natural catastrophe recalled in legend as the Flood or Deluge Sweeney points out that the presently accepted chronology of Egypt is

not based on science but on venerated literary tradition This chronology had already been established in its present form by the third century BC when Jewish historians utilizing the History of Egypt by the Hellenistic author Manetho sought to tie in Egypt's history with that of the Bible Apparent gaps and weird repetitions resulted Improbable feats like the construction of major cut stone engineering projects before the advent of steel tools or Pythagorean geometry point to the weaknesses of the traditional view Taking a more rigorous approach and pointing to solid evidence Emmet Sweeney shows where names overlap and where one and the same group is mistaken for different peoples in different times Volume 1 The Genesis of Israel and Egypt looks at the archaeological evidence for the Flood evidence now misinterpreted and ignored This volume examines the rise of the first literate cultures in the wake of the catastrophe and goes on to trace the story of the great migration which led groups of early Mesopotamians westward toward Egypt where they helped to establish Egyptian civilization This migration recalled in the biblical story of Abraham provides the first link between Egyptian and Hebrew histories The next link comes a few generations later with Imhotep the great seer who solved the crisis of a seven year famine by interpreting pharaoh Djoser's dream Imhotep is shown to be the same person as Joseph son of Jacob

Applying Anthropology Aaron Podolefsky, Peter J. Brown, 2003 This supplementary reader is composed of both classic and contemporary articles that demonstrate the significant contributions that cultural anthropologists make the emphasis is on the applicability of cultural anthropology to understanding and improving the present day human condition *Drum*, 2008

The Bonobos Takeshi Furuichi, Jo Thompson, 2007-12-24 Once one of the least studied of the great apes this new text covers the latest research into these fascinating creatures Split into two parts it covers scientific research which has attempted to answer why bonobos have some unique characteristics such as high social status of females and flexible social relationships Then it moves on to conservation Both the local and global aspects of the factors threatening the wild bonobo population are reviewed *Bonobo* Frans B. M. Waal, Frans Lanting, 1997 Primatologist Frans de Waal and wildlife photographer Frans Lanting present the most up to date perspective available on the bonobo the least known of the great apes 75 color plates

Uma Nova Ordem -A crise da modernidade e a busca por novos sistemas sociais, **Bonobos** Brian Hare, Shinya Yamamoto, 2017-10-20 The bonobo along with the chimpanzee is one of our two closest living relatives Their relatively narrow geographic range south of the Congo River in the Democratic Republic of Congo combined with the history of political instability in the region has made their scientific study extremely difficult In contrast there are dozens of wild and captive sites where research has been conducted for decades with chimpanzees Because data sets on bonobos have been so hard to obtain and so few large scale studies have been published the majority of researchers have treated chimpanzee data as being representative of both species However this

misconception is now rapidly changing With relative stability in the DRC for over a decade and a growing community of bonobos living in zoos and sanctuaries internationally there has been an explosion of scientific interest in the bonobo with dozens of high impact publications focusing on this fascinating species This research has revealed exactly how unique bonobos are in their brains and behavior and reminds us why it is so important that we redouble our efforts to protect the few remaining wild populations of this iconic and highly endangered great ape species

Our Inner Ape Frans de Waal, 2006-08-01 Visit the author's Web site at www.ourinnerape.com It's no secret that humans and apes share a host of traits from the tribal communities we form to our irrepressible curiosity We have a common ancestor scientists tell us so it's natural that we act alike But not all of these parallels are so appealing the chimpanzee for example can be as vicious and manipulative as any human Yet there's more to our shared primate heritage than just our violent streak In *Our Inner Ape* Frans de Waal one of the world's great primatologists and a renowned expert on social behavior in apes presents the provocative idea that our noblest qualities generosity kindness altruism are as much a part of our nature as are our baser instincts After all we share them with another primate the lesser known bonobo As genetically similar to man as the chimpanzee the bonobo has a temperament and a lifestyle vastly different from those of its genetic cousin Where chimps are aggressive territorial and hierarchical bonobos are gentle loving and erotic sex for bonobos is as much about pleasure and social bonding as it is about reproduction While the parallels between chimp brutality and human brutality are easy to see de Waal suggests that the conciliatory bonobo is just as legitimate a model to study when we explore our primate heritage He even connects humanity's desire for fairness and its morality with primate behavior offering a view of society that contrasts markedly with the caricature people have of Darwinian evolution It's plain that our finest qualities run deeper in our DNA than experts have previously thought Frans de Waal has spent the last two decades studying our closest primate relations and his observations of each species in *Our Inner Ape* encompass the spectrum of human behavior This is an audacious book an engrossing discourse that proposes thought provoking and sometimes shocking connections among chimps bonobos and those most paradoxical of apes human beings

Bonobo and Chimpanzee Takeshi Furuichi, 2019-11-22 This book describes the similarities and differences between two species bonobos and chimpanzees based on the three decades the author has spent studying them in the wild and shows how the contrasting nature of these two species is also reflected in human nature The most important differences between bonobos and chimpanzees our closest relatives are the social mechanisms of coexistence in group life Chimpanzees are known as a fairly despotic species in which the males exclusively dominate over the females and maintain a rigid hierarchy Chimpanzees have developed social intelligence to survive severe competition among males by upholding the hierarchy of dominance they can usually preserve peaceful relations among group members In contrast female bonobos have the same or even a higher social status than males By evolving pseudo estrus during their non reproductive period females have succeeded in moderating inter male sexual competition and in initiating mate selection

Although they are non related in male philopatric society they usually aggregate in a group enjoy priority access to food determine which male is the alpha male and generally maintain much more peaceful social relations compared to chimpanzees Lastly by identifying key mechanisms of social coexistence in these two species the author also seeks to find solutions or hope for the peaceful coexistence of human beings Takeshi Furuichi is one of very few scientists in the world familiar with both chimpanzees and bonobos In lively prose reflecting personal experience with apes in the rain forest he compares our two closest relatives and explains the striking differences between the male dominated and territorial chimpanzees and the female centered gentle bonobos Frans de Waal author of *Mama's Last Hug: Animal Emotions and What They Tell Us about Ourselves* Norton 2019 *The Bonobo and the Atheist* Henry Cabot Lodge (Jr.), Frans B. M. Waal, 2013-03-25 Moral behavior does not begin and end with religion but is in fact a product of evolution *Bonobo Cognition and Behaviour* Brian Hare, Shinya Yamamoto, 2015-10 This volume includes twelve novel empirical papers focusing on the behaviour and cognition of both captive and wild bonobos *Pan paniscus* Overall it demonstrates how anyone interested in understanding humans or chimpanzees must also know bonobos
