What Is History Edward Hallett Carr:

What is History? E. H. Carr, 2018-06-07 Not only one of our most distinguished historians but also one of the most valuable contributors to historical theory Spectator In formulating an answer to the question of What is History Carr argues that the facts of history are simply those which historians have chosen to focus on All historical facts come to us as a result of interpretive choices by historians influenced by the standards of their age Now for the first time in Penguin Modern Classics with an introduction by Richard J Evans author of the Third Reich trilogy What Is History? Edward Hallett Carr, 1967-10-12 Who is to say how things really were In formulating a modern answer to the question What is History Professor Carr shows that the facts of history are simply those which historians have selected for scrutiny Millions have crossed the Rubicon but the historians tell us that only Caesar's crossing was significant All historical facts come to us as a result of interpretative choices by historians influenced by the standards of their age Yet if absolute objectivity is impossible the role of the historian need in no way suffer nor does history lose its fascination With lucidity Carr casts a light on the proper function of the historian and the vital importance of history in modern society This is an admirably stimulating and intrepid book a bold excursion into a region of central importance where most contemporary philosophers and historians unaccountably either fear or disdain to tread Isaiah Berlin New Statesman *What is History?* Edward Hallett Carr, 1961 A philosophical interpretation of history examining the significance of historical study as a science and a reflection of social values E.H.Carr: A Critical Appraisal M. Cox, 2016-04-30 E H Carr 1892 1982 was born into security but lived a life of controversy Attacked for appeasing both Hitler and Stalin he was not only one of the most productive writers of the Twentieth century but one of its most provocative as well In this book the first ever to deal critically but fairly with Carr's contribution to international relations Soviet Studies and the study of history sixteen internationally respected authors grapple with his complex intellectual legacy For those seriously interested in understanding the life and times of this most English of establishment radicals this is the place to begin **In Defense of History** Richard J. Evans, 2015-06-15 A master practitioner gives us an entertaining tour of the historian's workshop and a spirited defense of the search for historical truth E H Carr's *What Is History* a classic introduction to the field may now give way to a worthy successor In his compact intriguing survey Richard J Evans shows us how historians manage to extract meaning from the recalcitrant past To materials that are frustratingly meager or overwhelmingly profuse they bring an array of tools that range from agreed upon rules of documentation and powerful computer models to the skilled investigator's sudden insight all employed with the aim of reconstructing a verifiable usable past Evans defends this commitment to historical knowledge from the attacks of postmodernist critics who see all judgments as subjective Evans brings a remarkable range a nose for the archives a taste for controversy and a fluent pen The New Republic to this splendid work Essential reading for coming generations Keith Thomas **Redescribing Christian Origins** Ronald Dean Cameron, Merrill P. Miller, 2004 These essays challenge the traditional

picture of Christian origins Making use of social anthropology they move away from traditional assumptions about the foundations of Christianity to propose that its historical beginnings are best understood as reflexive social experiments *Is History Fiction?* Ann Curthoys, 2010-10 The relationship between history and fiction has always been a controversial one Can we ever know that a historical narrative is giving us a true account of what actually happened Provocative and fascinating this book is an original and insightful examination of the ways in which history is and might be written It traces History's double

The Poetics of International Politics Milan Babík, 2018-10-26 A cutting edge contribution to the aesthetic turn in international relations scholarship this book exposes the role of poetic techniques in constituting the reality of international politics It has two symmetrical goals to illuminate the nonempirical fictions of factual international relations literature and to highlight the real factual inspirations and implications of contemporary international relations fiction Employing narrative theory developed by Hayden White the author examines factual and fictional accounts of world affairs ranging from the anarchy narrative central to mainstream international relations research to novels by Don DeLillo and Milan Kundera Chapters analyzing factual literature flesh out its unacknowledged inventions while those dedicated to fiction explain its political roots and agenda Throughout the distinction between factual and fictional representations of international relations breaks down Social scientific narratives emerge as exercises in rhetoric the art and politics of persuasion through language Artistic narratives surface as real pedagogical lessons and exercises in political activism The volume challenges the autonomy of academic international relations as an exclusive purveyor of serious knowledge about world affairs and calls for active engagement with literary art It will be of interest to scholars of International Relations Political Theory Historiography Cultural Theory and Literary Studies and Criticism

Inventing International Society T. Dunne, 1998-08-17 Inventing International Society is a narrative history of the English School of International Relations After E H Carr departed from academic international relations in the late 1940s Martin Wight became the most theoretically innovative scholar in the discipline Wight found an institutional setting for his ideas in The British Committee a group which Herbert Butterfield inaugurated in 1959 The book argues that this date should be regarded as the origin of a distinctive English School of International Relations In addition to tracing the history of the School the book argues that later English School scholars such as Hedley Bull and R J Vincent made a significant contribution to the new normative thinking in International Relations

The Political Sciences Hugh Stretton, 2013-04-15 Social science is a social activity as well as a method of discovery The researchers values and politics colour their work and so do their choices of scientific method This book is about both the technical effects of values and the political effects of technique The author reports what social scientists and historians actually do He sorts out the scientific from the political content in a wide range of old and new work in history sociology political science and economics The overall work is a detailed political and technical criticism of the scientific programme which would have researchers select for such qualities as objectivity uniformity and generality
