

- **What limits cell size?**
- As a cell increases in size its volume increases faster than its surface area.
 - Smaller objects have a greater ratio of surface area to volume.
 - Square/Cube Law
 - **What cell organelle is critical in maintaining this ratio?**

Surface area increases while total volume remains constant

Total surface area (height × width × number of sides × number of boxes)	6	150	750
Total volume (height × width × length × number of boxes)	1	125	125
Surface-to-volume ratio (area ÷ volume)	6	1.2	6

The Myths About Nutrition Science David Lightsey, 2019-11-14 Many nutrition science and food production myths and misconceptions dominate the health and fitness field and many athletes and active consumers unknowingly embrace a myriad of what can be deemed junk science which has now infiltrated many related science fields. Consumers simply have no reliable source to help them navigate through all the hype and fabrication leaving them vulnerable to exploitation. The aim of *The Myths About Nutrition Science* is then to address the quagmire of misinformation which is so pervasive in this area. This will enable the reader to make more objective science based lifestyle choices as well as physical training or developmental decisions. The book also enables the reader to develop the necessary critical thinking skills to better evaluate the reliability of the purported science as reported in the media and health related magazines or publications. *The Myths About Nutrition Science* provides an authoritative yet readily understandable overview of the common misunderstandings that are commonplace within consumer and athlete communities regarding the food production process and nutrition science which may affect their physical development, performance and long term health.
