What Is Eez:

Coastal State Jurisdiction over Living Resources in the Exclusive Economic Zone Camille Goodman, 2021-11-15 Under the 1982 United Nations Convention on the Law of the Sea coastal States have sovereign rights to explore exploit conserve and manage the living resources of the 200 nautical mile exclusive economic zone EEZ However 40 years after the adoption of the Convention there is still a great deal of uncertainty about the nature and extent of these sovereign rights Coastal State Jurisdiction over Living Resources in the Exclusive Economic Zone examines the ways in which coastal States can exercise authority on the basis of their sovereign rights over living resources in the EEZ Dr Camille Goodman explores the key concepts of fishing and fishing related activities to establish what vessels and which activities can be regulated by coastal States canvasses the criteria and conditions that coastal States can apply as part of regulating foreign access to their resources and considers the regulation of unlicensed foreign fishing vessels in transit through the EEZ Goodman also examines how such regulations can be enforced within the EEZ and the circumstances under which enforcement can take place beyond the EEZ following hot pursuit A review and analysis of the practice of 145 States identifies the contemporary extent of coastal State jurisdiction over living resources in the EEZ and offers a unique fresh perspective on the underlying and enduring nature of that jurisdiction Underpinned by a rigorous examination of the Convention jurisprudence and literature as well as being supported by carefully documented State practice Coastal State Jurisdiction over Living Resources in the Exclusive Economic Zone proposes a more predictable framework within which to resolve jurisdictional challenges in the EEZ

The Exclusive Economic Zone Charles Quince, 2019-02-15 Traditionally the law of the sea was divided into the territorial sea and the high seas which accounted for the application of different rules under different circumstances Concerning the territorial sea the coastal state enjoys full sovereignty to the right of innocent passage while under the high seas rules all countries enjoy multifaceted uses of the sea qualified only by the limitations imposed by international law The development of the exclusive economic zone ended this traditional dualism and ushered in guidelines that are embodied within the text of the LOS Convention The Exclusive Economic Zone presents to academia and the general reading public a comprehensive study of the EEZ concept as it relates to the LOS Convention and state practice The Exclusive Economic Zone shows that even though coastal states have the right to develop a 200 miles EEZ and that this right is an integral part of contemporary international relations it is also true that the EEZ concept is shrouded in legal ambiguities Using qualitative and inductive methods the scholarship draws on treaties official proclamations government archives and scholarly works that are germane to the development of the EEZ Students scholars and members of the general public with an interest in international law will find that The Exclusive Economic Zone deepens their understanding of the evolution of the EEZ concept

The Fisheries Regime of the Exclusive Economic Zone M. Dahmani, 2021-09-27 [Exclusive Economic Zone](#), 1984 [Specially Protected Marine Areas in the Exclusive Economic Zone \(EEZ\)](#) Thomas Dux, 2011 This thesis examines

the question of what States are legally empowered to do under international law when they seek to protect certain areas of their Exclusive Economic Zone EEZ In this context the regulation of shipping and other human activities under the Law of the Sea Convention and in particular the regime for special areas under Article 211 6 of the Convention are addressed Global and regional instruments containing mechanisms to protect specific areas are discussed and relevant State practice is considered with a view to possible implications on customary international law Finally guidance is given as to what States can practically do to protect specific areas of their EEZ for environmental reason Series Schriften zum See und Hafenrecht Vol 18 **The 200 Mile Exclusive Economic Zone in the Law of the Sea** Barbara Kwiatkowska,2021-09-27

Symmons,2011-06-09 Drawing on papers presented at Trinity College Dublin in 2010 Selected Contemporary Issues in the Law of the Sea provides a cohesive discussion on various challenges involved with the law of the sea International experts cover topics such as straight baselines high seas EEZ jurisdiction the definition of and jurisdiction over piracy and submissions to the CLCS relating to outer continental shelf claims in disputed areas In addition Selected Contemporary Issues in the Law of the Sea delves into topics seemingly neglected in contemporary literature The permissible use of artificial constructions as basepoints is discussed for example as are human rights issues involved in boarding non flag ships and in the context of piracy issues such as the Japanese and NGO Greenpeace attitudes to current interventions so called eco piracy by NGO ships to prevent Japanese whaling activities in Antarctic waters *A Sea Change: The Exclusive Economic Zone and Governance Institutions for Living Marine Resources* Syma A. Ebbin,Alf H. Hoel,Are Sydnes,2005-01-07 This is the first systematic assessment of the international 200 mile exclusive economic zone To date 145 states have ratified the Law of the Sea Convention and most have established EEZs This volume focuses on the specific nature of the EEZ and the construction and evolution of institutions stemming from its introduction specifically examining developments at local national and international levels *Proceedings of the 1991 Exclusive Economic Zone Symposium on Mapping and Research* Geological Survey (U.S.),1992 **The Oxford Handbook of the Law of the Sea** Donald R. Rothwell,Alex G. Oude Elferink,Karen N. Scott,Tim Stephens,2015-03-26 Human activities have taken place in the world s oceans and seas for most of human history With such a vast number of ways in which the oceans can be used for trade exploited for natural resources and fishing as well as concerns over maritime security the legal systems regulating the rights and responsibilities of nations in their use of the world s oceans have long been a crucial part of international law The United Nations Convention on the Law of the Sea comprehensively defined the parameters of the law of the sea in 1982 and since the Convention was concluded it has seen considerable development This Oxford Handbook provides a comprehensive and original analysis of its current debates and controversies both theoretical and practical Written by over forty expert and interdisciplinary contributors the Handbook sets

out how the law of the sea has developed and the challenges it is currently facing The Handbook consists of forty chapters divided into six parts First it explains the origins and evolution of the law of the sea with a particular focus upon the role of key publicists such as Hugo Grotius and John Selden the gradual development of state practice and the creation of the 1982 UN Convention It then reviews the components which comprise the maritime domain assessing their definition assertion and recognition It also analyses the ways in which coastal states or the international community can assert control over areas of the sea and the management and regulation of each of the maritime zones This includes investigating the development of the mechanisms for maritime boundary delimitation and the decisions of the International Tribunal for the Law of the Sea The Handbook also discusses the actors and intuitions that impact on the law of the sea considering their particular rights and interests in particular those of state actors and the principle law of the sea institutions Then it focuses on operational issues investigating longstanding matters of resource management and the integrated oceans framework This includes a discussion and assessment of the broad and increasingly influential integrated oceans management governance framework that interacts with the traditional law of the sea It considers six distinctive regions that have been pivotal to the development of the law of the sea before finally providing a detailed analysis of the critical contemporary issues facing the law of the sea These include threatened species climate change bioprospecting and piracy The Handbook will be an invaluable and thought provoking resource for scholars students and practitioners of the law of the sea

The Continental Shelf and the Exclusive Economic Zone / Le plateau continental et la zone économique exclusive Donat Pharand, Umberto Leanza, 2022-02-22 This volume focuses on both the general aspects of two of the most typical institutions introduced by the new Law of the Sea and the specific aspects related to the geographic and economic circumstances of Italy and Canada It is divided into two parts The first part deals with the delimitation of maritime boundaries especially with respect to the continental shelf and the exclusive economic zone The problem is approached from both a theoretical and a practical point of view in particular in analyzing not only the more well known controversies in delimitation solved by international agreements or by international courts but also still unsettled disputes in which Italy and Canada are involved The second part deals with the legal regime of the continental shelf and the exclusive zone and the activities in particular exploration and exploitation carried out in them The same approach as in Part One is used in juxtaposing Italian and Canadian views on relative regulation Indeed the volume brings together the diverse legal experience of the two countries Italy and Canada resulting from the different geographic political and economic conditions found in each It is enough to think that Italy is surrounded on three sides by a closed or semiclosed sea the Mediterranean while Canada borders on the Atlantic Pacific and Arctic Oceans The volume was financed by the Italian National Research Council CNR and edited by Donat Pharand Professor Emeritus of International Law at the University of Ottawa and Umberto Leanza Full Professor of International Law at the University of Rome Tor Vergata

The Predominant Interest Concept and Maritime Delimitation Nicholas A. Ioannides, 2025-05-14 This accessible book provides an introduction to the predominant interest concept covering global case studies and landmark legal proceedings around maritime delimitation Nicholas A Ioannides provides a comprehensive overview of the delimitation process identifying the criteria used to determine the delimitation of maritime areas *Law, Force and Diplomacy at Sea (Routledge Revivals)* Ken Booth, 2014-06-27 Law Force and Diplomacy at Sea first published in 1985 is one of the few comprehensive treatments on the subject from a strategic perspective It offers a detailed strategic analysis of the background and outcome of the Third UN Conference on the Law of the Sea and its naval implications The interplay between the interest of the naval powers in freedom of navigation and the interest of coastal states in control provides the setting for the strategic problems The sea is taking on more properties of the land it is becoming territorialised and this is presenting fresh challenges and opportunities to which navies and their national governments have to respond This study is designed for students of naval strategy for international lawyers and for students of international affairs who wish to think about the important security questions in the maritime environment U.S. Geological Survey Circular , 1933 **Sovereignty and**

Jurisdiction in Airspace and Outer Space Gbenga Oduntan, 2011-09-12 Sovereignty and jurisdiction are legal doctrines of a complex nature which have been subject to differing interpretations by scholars in legal literature The tridimensionality of state territory recognised under customary international law subsists until the present but there are other territories that do not or cannot belong to any state or political entity which also must be accounted for in legal theory The issues surrounding sovereignty and jurisdiction are likely to become ever more pressing as globalisation growing pressure on resources and the need for energy and national security become acute and the resolution of special delimitation disputes seems likely to become a vital question in the twenty first century As a result of the fast pace of technological developments in air and space activities and the massive increases in air transportation satellite communications and space exploration the need for scholars and practitioners to sharpen their appreciation of the legal and political issues becomes crucial This book will focus primarily on the issues of sovereignty jurisdiction and control in airspace and outer space and their effects on public and

private activities but it will also look at related issues pertaining to the Seas and Antarctica Commercial exploitation resource control and the international regime regulating contractual obligations in relation to transportation of goods and services over all forms of territory will be examined to the extent that they are necessary to explain jurisdictional rights and duties over territory Older problems of international law such as crimes in the air and airspace trespass are treated along with newer developments such as space tourism as well as growing demand for private ownership and involvement in outer space exploitation The book goes on to consider the distinction between airspace and outer space and puts forward legal criteria which would allow for the resolution of the spatial delimitation dispute These criteria would determine where in spatial terms the exclusive sovereignty of airspace ends and where outer space the province of all mankind begins and contribute to the jurisprudence of territorial sovereignty and jurisdiction *1988 Annual Report on Alaska's Mineral Resources* ,1988
