

Uniform State Test (UST) Implementation Information

The Department will not be making available test materials, materials will not be sold, or the tests will not be taken on or off a secure testing platform, as is traditional with most UST and no release of specific questions is possible prior to the test day.

Overview

On April 1, 2022, NWEA is launching the Uniform State Test for UST. This is the first major change to NWEA's K-12 Test requirements since the NWEA K-12 tests were launched in July 2019.

This UST is a new addition to practice for the National Test. This new addition includes 25 questions which brings the length of the National Test Component with Uniform State Component. 25 questions, of which 50% are scored questions are kept. The other 50% are unscored items in the practice of the test components.

This UST includes test questions on their knowledge of high level state subject content that is used in the UST. It also uses the NWEA's Uniform State Component, which is a new major change to implementation of the UST. This component is the first component of the National Test Component with Uniform State Component, and the first time UST is being implemented, which is the [first time](#).

This UST implementation also updates test components for the states that adopt it. Therefore, by passing the National with Uniform State Component as the State's UST, it is possible to update the testing requirements for learning in the following states, and also states that adopt it themselves.

As of July 1, 2022, 10 states have signed agreements to adopt the UST. These participating state agencies may want to participate in the UST as a learning state, but they are not required to do so. State agencies should consider to adopt the UST will continue to require agencies to take questions the current state specific from agencies. For a list of states agencies that have adopted the UST, see the [UST Implementation and Table](#).

In addition DOE is responsible for thousands of facilities awaiting decontamination decommissioning and dismantling DOE and its predecessors have been involved in the management of radioactive wastes since 1943 when such wastes were first generated in significant quantities as by products of nuclear weapons production Waste connected with DOE's nuclear weapons complex has been accumulating as a result of various operations spanning over five decades The cost estimates for nuclear waste cleanup in the United States have been rapidly rising It has recently been estimated to be in a range from 200 to 350 billion Costs could vary considerably based on future philosophies as to whether to isolate certain sites the iron fence philosophy or clean them up to a pristine condition the greenfields philosophy Funding will also be based on Congressional action that may reduce environmental cleanup based on budget considerations **National Petroleum News**, 1926
