are already in use at a number of locales throughout the United States. These techniques stress interacting with students as communicators using synchronous and asynchronous environments describing the processes and products of student learning rather than enumerating deficits situating pedagogy and evaluation within systems that incorporate rather than exclude local variables and distributing assessment among diverse audiences. By advocating for a flexible system of communication based assessment in computer mediated writing instruction this book validates teachers and students experiences with writing and also acknowledges the real world weight of the new writing components on the SAT and ACT as well as on state mandated standardized writing and proficiency exams
