You can taste sweet, salt, sour and bitter food. Your tongue helps you to taste. The surface of the tongue has many tiny bumps called taste buds. These taste buds contain the ends of nerves. There are four different kinds of taste buds to detect the four kinds of taste. The taste messages are sent to the brain through nerves.

### The Skin

Your skin covers your body. It protects the inside of your body from dirt, germs and from getting hurt. The skin also contains many endings of nerves.
