"Code of Massachusetts regulations, 1995", 1995 Archival snapshot of entire looseleaf Code of Massachusetts Regulations held by the Social Law Library of Massachusetts as of January 2020

HIPAA standards dual code sets are acceptable for reporting medical procedures., 2002 Medical care involves the provision of a myriad of health related services from the diagnosis of medical

condition to its treatment A means to consistently classify define and distinguish among these and other health related services is critical for reimbursing providers and analyzing health care utilization outcomes and cost Codes serve this role by assigning each distinct service a unique identifier Health care providers such as hospitals and physicians report medical conditions and the health related services they have provided to patients on medical records which are in turn transcribed into corresponding codes by coding professionals These codes are then reported on claims forms and submitted to both public and private payers for payment In addition to their use in these financial and administrative transactions codes facilitate the analysis of data that are used in monitoring resource utilization and cost measuring the quality safety and efficacy of care analyzing outcomes of treatment options and identifying fraud and abuse Until recently there was wide variability in requirements for coding health related services such as procedures diagnoses medical devices supplies and prescription drugs For example coding requirements could vary from payer to payer making the filing of claims with multiple payers administratively burdensome for providers In addition this wide variability in coding made it difficult to electronically transmit standardized health related information and compromised the reliability of health related data In enacting the Health Insurance Portability and Accountability Act of 1996 HIPAA the Congress sought to simplify data reporting and claims processing requirements across all providers and payers and facilitate the electronic transmission of health related information 1 *Morbidity and Mortality Weekly Report*, 2007 "Code of Massachusetts regulations, 1987", 1987 Archival snapshot of entire looseleaf Code of Massachusetts Regulations held by the Social Law Library of Massachusetts as of January 2020 *Scientific and Technical Aerospace Reports*, 1995 Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database Dictionary of Acronyms and Technical Abbreviations Jakob Vlietstra, 2012-12-06 This second edition contains a collection of technical abbreviations acronyms and identifiers in short terms that are used in information and communication technologies and other related areas They have become part of the normal vocabulary in many industries institutes organizations and universities Too often they are used without mentioning what they stand for The main area covered by this dictionary is Information and Communication Technology ICT This includes computer and communication hardware and software communication networks the Internet and the World Wide Web and automatic control Other areas covered are ICT related techniques solutions products processes and activities The dictionary also contains symbolic names of organizations and institutions directly connected to the subjects listed above as well as the abbreviated names of conferences symposia workshops where the mentioned subject areas are treated In some cases the standard two letter country codes are listed between parenthesis at the end of every explained term and the country where the term originated This is a reference book that is important for all practitioners and users in the areas mentioned above Technical publications often omit the meaning of terms and confront the reader with jargon too often
