Disciplines Roger Graves, 2017-12-07 Writing Assignments Across the University Curriculum as a whole asks and answers these questions What kinds of documents do students write in a wide range of university degree programs in Canada How do instructors structure those writing assignments That is who is the audience for the assignments Do students get formative feedback as they develop their documents Do the patterns we found in a small liberal arts college Graves Hyland and Samuels 2010 occur in other kinds of universities We took our cue from an article by Anson and Dannels 2009 who pointed us toward the idea that students experience a curriculum through their degree progress in an academic program Consequently we needed to map the writing assignments according to how different departments organized these degree programs Results that were organized by curricular unit departments faculties or colleges or programs units were more significant than general statistics because students would progress through these courses to a degree Several chapters in the book describe how this kind of curricular mapping provided a spark for curricular reform in Engineering Education and an entire small university The last two chapters report on the instructors perspective on their assignments what they were intending to do and why they both resisted and engaged in curricular discussions **November 2019 Monthly Current**

Sustainable Cities Simon Joss, 2017-08-24 Interest in the sustainable city is growing around the world and with it come important questions about governing sustainable urban development Why are there blockages to achieving the goal of a sustainable city How is it possible to overcome the practical difficulties that initiatives often face And how can an increasingly technocratic focus be rebalanced with more of a public perspective In this wide ranging text Simon Joss examines mainstream policy and practice and looks at the approaches that can overcome some of their drawbacks The author examines the core elements of sustainable planning and how processes of innovation governance and policy making work together to achieve sustainable urban change He assesses the various challenges faced at both the domestic and international level and across a range of urban scales These challenges include how to resolve environmentally problematic ways of city living at the same time as providing for urban social and economic development and how to adapt the idea and

reality of the sustainable city to different geopolitical contexts The author recognizes that there is no one size fits all solution and examines the range of methods available In an era where entirely new eco cities are being built and established ones being retro fitted in response to environmental pressures this text looks at the varying successes of the urban sustainability movement and its relationship to the planners policy makers and citizens who are inseparable from it Providing an accessible account of the latest developments in research and policy as well as examples from around the world this is indispensable reading for students researchers and practitioners alike Ecosystem-Based Adaptation Arvind Kumar,2022-02-16

Ecosystem Based Adaptation Approaches to Sustainable Management of Aquatic Resources presents a close examination of the role of ecosystem based adaptation in managing river basins aquifers flood plains and their vegetation to provide water storage and flood regulation Furthermore the book explores improved ecosystem based services for managing floods conservation of water and its resources including watersheds avoiding water scarcity and ensuring long term water security planning all in the context of sustainable development goals This book will help scientists pave the way for easy implementation of sustainable development goals ensuring a secure and sustainable future Presents information in an easy to follow manner using tables figures and graphs where applicable along with case studies from all continents Provides a reference for experts to use as an authoritative source to support environmental action and regulation Delineates the role of ecosystem based adaptation in sustainable management and in the restoration of watershed forests and wetlands

Governing Intellectual Property Rights Within Publicly Funded Biobanks Rajam Neethu,2019-06-21 Governing Intellectual Property Rights Within Publicly Funded Biobanks R Neethu The boom in biobanks and health databases as research infrastructures have evoked various legal and ethical debates Since then numerous new developments have emerged such as digitalization big data research and artificial intelligence which has important implications for biobank based research and collaborations This new paradigm offers new legal challenges for commercial involvement particularly within a publicly funded setting In this innovative book the author shows that securing maximum social benefit out of the knowledge emanating from the use of biobank resources lies in managing intellectual property inputs and outputs effectively in keeping with the values core to such research Focusing on the challenges of involving intellectual property rights IPRs particularly in the precompetitive phase of biobank based research the book offers an extensive understanding of the role of different IPRs and identifies the gaps in the law and its implications for biobanks The analysis covers important aspects in relation to biobanks such as Digital integration and biomedical data storage Ownership of biological samples Commercialization and benefit sharing Partnership models Public sector research Disposition of samples Consent Cross border exchange Trade secrecy Privacy Regulatory stewardship Business strategies Ethical considerations over biological resources Patenting of inventions relating to personalized medicine Ethical parameters within patent law and Rights regarding genetic data and databases The book includes observations case studies and interviews conducted by the author In

conclusion the author offers cogent recommendations for legal interoperability of IP rules and research practices designed to enhance the ability of biobanks to share access and reuse data This book is the first of its kind to explore the organizational and legislative choices for biobanks particularly while engaging in the protection of research results and technology transfer within a publicly funded setting It will be of substantial interest to all stakeholders in biobanking especially policymakers biobankers and researchers working in the field of health law as well as for legal practitioners academics and patient interest groups

Law, Gender Identity, and the Brain Aileen Kennedy, 2023-12-08 This book challenges law's reliance on neurology's brain sex binary The brain has become the latest candidate in a historical search for a reliable and fixed biological marker of true sex that has permeated every aspect of Western culture including law As definitions of the sexed and gendered body have become ever more contentious the development and dissemination of brain sex theories have come to dominate popular understanding of LGBTI identities But this book argues the brain is no more helpful than earlier biological measures in ensuring just outcomes Examining how law determines and differentiates male and female in two contested areas of sexed identity through a discussion of Australian cases authorising medical interventions to alter the embodied sex characteristics of transgender minors and intersex minors the book demonstrates an incoherence in the legal understanding of gender identity development As the brain too fails as a convincing biological anchor for the binary sex categories of male and female law must it is argued retreat from its aspiration to create define and regulate artificially bounded sex categories of male and female This book will be of great interest to scholars and students in a range of disciplines who are working at the intersection of law gender and sexuality

Applying Dialogic Pedagogy Cynthia Z. Cohen, 2018-08-15 Recent academic research criticizes the effectiveness of traditional lecturing methods and instead shows the pedagogical effectiveness of active learning methods especially discussion based education Drawing on the dialogic writings of Bakhtin Freire and Habermas this study reviews the five primary themes cited in active learning research improvements in student concentration socialization in disciplinary norms scaffolding towards higher critical thinking inclusion of non traditional learning styles and reduction of student absenteeism Testing these findings in a discussion based undergraduate college education classroom this study finds significant improvements towards higher critical thinking skills increased student concentration and reduced student absenteeism However the study finds questionable effectiveness of discussion based teaching for socializing undergraduate college education students in disciplinary norms

The Social Genome Dalton Conley, 2025-03-18 A pioneering scientist presents a mind expanding account of the sociogenomics revolution which promises to upend everything we know about human development For more than 150 years the question of nature versus nurture has been one of the most contentious issues in the human sciences On the one side are blank slaters who believe we are mainly shaped by our environment On the other side are hereditarians who believe in the primacy of genes From the start the fight has been highly politicized and extremely bitter given that it has implications for how we think about racial disparities

meritocracy reproduction and free will itself In *The Social Genome* pioneering scientist Dalton Conley demonstrates that this longstanding debate is fundamentally misguided The true question is not nature versus nurture but how nature and nurture interact to make each of us who we become *The Social Genome* is a sweeping account of the sociogenomics revolution which has in the last decade upended many of our notions about human development Sociogenomics brings together advances in molecular genetics and traditional social and behavioral science The key tool is the polygenic index which allows us to analyze DNA to measure a child's genetic potential Today we can estimate a child's adult height how far they will go in school and their weight as an adult all from a cheek swab finger prick or vial of saliva Conley and other researchers are using this new science to shed light on the ways in which genes shape our world influencing how each person both creates and responds to the environment around them Conley reveals a world where children's DNA influences the nurture they extract from their parents the genes of our schoolmates affect our likelihood of smoking as much as our own DNA does and spouses' genes influence each other's moods and behaviors Looking forward Conley envisions a future where dating education public health and other institutions have been radically altered by the sociogenomic revolution As Conley argues we should no longer think of nature versus nurture but about how our genes seek the nurture they need to express themselves and how in turn our environments are made partly from the genes of other people *The Social Genome* presents a nuanced powerful perspective on individual potential and social dynamics and raises critical ethical questions about how we will navigate a future where we have access to far more genetic information than ever before

The Law and Ethics of Data Sharing in Health Sciences Marcelo Corrales Compagnucci, Timo Minssen, Mark Fenwick, Mateo Aboy, Kathleen Liddell, 2024-01-02 Data sharing broadly defined as the exchange of health related data among multiple controllers and processors has gained increased relevance in the health sciences over recent years as the need and demand for collaboration has increased This includes data obtained through healthcare provisions clinical trials observational studies public health surveillance programs and other data collection methods The practice of data sharing presents several notable challenges however Compliance with a complex and dynamic regulatory framework is essential with the General Data Protection Regulation being a prominent example in a European context Recent regulatory developments related to clinical trial transparency trade secrecy data access AI training data and health data spaces further contribute to the difficulties Simultaneously government initiatives often encourage scientists to embrace principles of open data and open innovation The variety of regulations in this domain has the potential to impede widespread data sharing and hinder innovation This edited volume therefore compiles comparative case studies authored by leading scholars from diverse disciplines and jurisdictions The book aims to outline the legal complexities of data sharing By examining real world scenarios from diverse disciplines and a global perspective it explores the normative policy and ethical dilemmas that surround data sharing in the health sciences today Chapter Patient Perspectives on Data Sharing Chapter Supplementary Measures and Appropriate Safeguards for International Transfers of

Nullifying God H. Robert Wilson Ph.D., 2018-01-01

Evolution and Creation are in a spiritual battle. Evolution scientists ignore, dismiss, and unequivocally reject Creation out of hand. It is not science or fact as evolution is, they say. However, *Nullifying God* shows that random Darwinian evolution does not have the direct evidence required to support the claim. Not only that, but it provides contrary evidence that evolution is biologically impossible. Because that is the case, evolution can only persist in the unchallengeable authority it needs to maintain its position by actively attempting to nullify its alternative, Creation, and therefore the Bible and *God Nullifying God* was especially written to empower and benefit believers who are not familiar with science to show them that evolution cannot be fact and is not science. It does so by 1) providing them with a core foundation of applied science principles to rationally question evolution's claims, then 2) guiding them into solid, clear knowledge of why evolution is biologically impossible, and finally 3) presenting them with examples that document evolution's attempts to nullify God. The bottom line is: Biblical Creation is the only answer that explains life.
