African Data Privacy Laws Alex B. Makulilo, 2016-11-30 This volume presents analyses of data protection systems and of 26 jurisdictions with data protection legislation in Africa as well as additional selected countries without comprehensive data protection laws In addition it covers

all sub regional and regional data privacy policies in Africa Apart from analysing data protection law the book focuses on the socio economic contexts political settings and legal culture in which such laws developed and operate It bases its analyses on the African legal culture and comparative international data privacy law In Africa protection of personal data the central preoccupation of data privacy laws is on the policy agenda The recently adopted African Union Cyber Security and Data Protection Convention 2014 which is the first and currently the only single treaty across the globe to address data protection outside Europe serves as an illustration of such interest In addition there are data protection frameworks at sub regional levels for West Africa East Africa and Southern Africa Similarly laws on protection of personal data are increasingly being adopted at national plane Yet despite these data privacy law reforms there is very little literature about data privacy law in Africa and its recent developments This book fills that gap ECSM 2017 4th European Conference on Social Media Academic Conferences and Publishing Limited,2017-07-03 *Sustainable Development Goals for Society Vol. 1* Godwell Nhamo,Muchaiteyi Togo,Kaitano Dube,2021-06-16 Written by 43 authors from Africa Europe and Latin America this book presents 19 topics addressing poverty in the context of Sustainable Development Goals SDGs leadership in implementing SDGs and SDGs in service delivery and local government As the world has gone past five years of implementing the 2030 Agenda for Sustainable Development and the intertwined 17 SDGs new opportunities in research continue to open up Hence documenting some of the initiatives put in place around the world regarding the implementation of the SDGs is one of the aims of this publication With 10 years remaining the book further enhances the desire to scale up SDGs implementation The selection of case studies from the selected regions also provides a balance in terms of how the SDGs are being rolled out for economic growth environmental stewardship and social protection The ambition remains even with the challenge brought by the COVID 19 pandemic that preoccupied the whole of 2020 spilling over to 2021 There is no doubt that resources have been diverted but the world must stay on the course to 2030 and beyond Therefore the book is relevant for several stakeholders including the academics development partners government officials and other individuals that are involved in making sure no one is left behind in the lead to 2030 **Circular Economy for Buildings and Infrastructure** Jian Zuo,Liyin Shen,Ruidong Chang,2024-05-03 This edited volume covers theoretical and practical aspects of circular economy in building development offering chapters dealing with topics such as material design affordability of housing development waste management and recycling smart metering and more A particular focus is placed on various stakeholders points of view The book s chapters are co developed and contributed by multidisciplinary teams including both academics and industry practitioners The case study oriented approach taken here helps to facilitate the reader s understanding of how building sustainability can be achieved in the context of circular economy The building industry has significant environmental social and economic impacts As one of the biggest energy consumers and carbon emitters building sustainability has attracted wide attention globally Building projects and their associated activities consume a large amount of energy natural resources and

water while producing a large proportion of wastes throughout their lifecycles The traditional linear approach of make use and dispose has been heavily criticized whilst the circular approach has gained momentum Indeed circular economy has emerged as one of key principles to manage sustainability related issues by means of focusing on the circularity of resources as well as the cost implications
