## Unison Aero® Resonate Ceiling Mount Occupancy / Vacancy Sensor

### Overview

The Aero Resonate Ceiling Mount Occupancy / Vacancy Sensor is a wireless passive Infrared (PIR) vacancy sensor that provides battery-free, wireless control of lighting, combined with simple installation and long-term maintenance-free reliability.

### Models available

| <i>Model</i> | <i>Description</i>                                     |
|--------------|--------------------------------------------------------|
| UARVSS-5     | Small room 450 feet <sup>2</sup> (41.8m <sup>2</sup> ) |
| UARVSL-5     | Large 1800 feet <sup>2</sup> (167.2m <sup>2</sup> )    |

The sensor requires no wiring connections and requires no batteries, although one can be used if needed. In normal operation, charged solar cells provide power to the sensor.

The sensor communicates with linked Aero power controllers to manage lighting within interior spaces. The sensor detects the occupancy or vacancy state of the room by monitoring motion using an integral passive infrared motion (PIR) detector.

On initial occupancy detection, the sensor broadcasts occupancy messages to the linked controllers and the loads will turn on. The sensor repeats the occupied message every 100 seconds until occupancy is no longer detected, also known as vacancy. After an additional 100 seconds with no motion detected, the sensor transmits a vacancy message and the linked controllers turn their connected loads off.
