Leppien, Jeanne H. Purcell, 2011-02-15 Teachers at various stages of professional development in curriculum design will find these materials powerful examples that will guide their growth and development and sharpen their skills Mary L Slade Professor James Madison University Harrisonburg VA Supercharge your science curriculum to challenge all students Based on the best selling book The Parallel Curriculum this professional development resource gives multifaceted examples of

rigorous learning opportunities for science students in Grades 6-12. The four sample units revolve around genetics, the convergence of science and society, the integration of language arts and biology, and the periodic table. The editors and contributors provide user-friendly methods for creating more thoughtful lessons and show how to differentiate them for the benefit of all students. Included are field-tested and standards-based strategies that guide students through exploring the nature of knowledge, discovering connections between science and other subjects, deepening science comprehension according to their interests and abilities, connecting science to society through the study of genetics, historic events, literature, and chemistry. Each unit includes subject matter background, a content framework, study components, teacher reflections, and sample lessons. Also available are online content tools such as handouts, PowerPoint presentations, and research activities.
