1 1 COMMUNICATION WHILE TRAVELLING

The pace of our daily life has been increasing for several decades

Our needs have multiplied as new products have appeared and then been replaced after a few years or even months of existence by a more fashionable product or one of higher performance

The life cycles of the technologies used in consumer and professional electronic products are also becoming shorter

This acceleration is an inherent fact of our consumer society and the relationship between people and machines are Lifestyles

due to the multiplicity of ephemeral consumer products

Objects changing no longer have a history they are merely tools which fulfil a predetermined function

Personal portable products are of a new type which has appeared among pens wallets these impersonal objects

This category includes watches handbags calculators portable radios and pocket telephones

As these products for the pocket are carried on one s person they belong in a very personal way and have therefore a specific identity corresponding to the image which they are given

In the evolution of lifestyles the explosive increase of travel and time management are major factors

The pocket telephone is therefore remark able for two reasons

It is not only an impersonal tool or product but is also very much a personal portable product

The possibility of distant com munication while travelling

being able to call or be called at will anywhere at any time permits the pocket telephone to be often considered as a desirable almost magic personal item

The Informatics Handbook S.A. Fist,2012-12-06 This is not a dictionary and nor is it an encyclopedia It is a reference and compendium of useful information about the converging worlds of computers communications telecommunications and broadcasting You could refer to it as a guide for the Information Super Highway but this would be pretentious It aims to cover most of the more important terms and concepts in the developing discipline of Informatics which in my definition includes the major converging technologies and the associated social and cultural issues Unlike a dictionary this handbook makes no attempt to be prescriptive in its definitions Many of the words we use today in computing and communications only vaguely reflect their originations And with such rapid change older terms are often taken twisted inverted and mangled to the point where any attempt by me to lay down laws of meaning would be meaningless The information here is descriptive I am concerned with usage only This book therefore contains keywords and explanations which have been culled from the current literature from technical magazines newspapers the Internet forums etc This is the living language as it is being used today not a historical artifact of 1950s computer science **Moody's International Manual** ,1995 *Global Mobile*
