the entirety of behaviors that could be considered criminal offenses into mutually exclusive categories Modernizing Crime Statistics Report 1 Defining and Classifying Crime assesses and makes recommendations for the development of a modern set of crime measures in the United States and the best means for obtaining them This first report develops a new classification of crime by weighing various perspectives on how crime should be defined and organized with the needs and demands of the full array of crime data users and stakeholders

Addington,2006-12-04 In *Understanding Crime Statistics* Lynch and Addington draw on the work of leading experts on U S crime statistics to provide much needed research on appropriate use of this data Specifically the contributors explore the issues surrounding divergence in the Uniform Crime Reports UCR and the National Crime Victimization Survey NCVS which have been the two major indicators of the level and of the change in level of crime in the United States for the past 30 years This book examines recent changes in the UCR and the NCVS and assesses the effect these have had on divergence By focusing on divergence the authors encourage readers to think about how these data systems filter the reality of crime *Understanding Crime Statistics* builds on this discussion of divergence to explain how the two data systems can be used as they were intended in complementary rather than competitive ways
