Reimagining Social Medicine from the South Abigail H. Neely,2021-07-12 In Reimagining Social Medicine from the South Abigail H Neely explores social medicine s possibilities and limitations at one of its most important origin sites the Pholela Community Health Centre PCHC in South Africa The PCHC s focus on medical and social factors of health yielded remarkable success And yet South Africa s systemic racial inequality hindered health center work and witchcraft illnesses challenged a program rooted in the sciences To understand Pholela s successes and failures Neely interrogates the social in social medicine She makes clear that the social sciences the PCHC used failed to account for the roles that Pholela s residents and their environment played in the development and success of its program At the same time the PCHC s reliance on biomedicine prevented it from recognizing the impact on health of witchcraft illnesses and the social relationships from which they emerged By rewriting the story of social medicine from Pholela Neely challenges global health practitioners to

recognize the multiple worlds and actors that shape health and healing in Africa and beyond Securitisation as Hegemonic Discourse Formation Hannah Broecker, 2022-10-25 This book offers a model for understanding securitization in terms of hegemonic discourse formations. It rethinks the very meaning of security as well as the relationship between the understanding of security in traditional and critical approaches in security studies to find a common denominator between them. Deduced firmly from realist political philosophy and its analytic categories such as state based sovereignty security is presented as a function of discursive formations. Providing a sound discourse theoretical foundation which includes both linguistic and non linguistic practices as well as a focus on relationships of power, the book offers a basis for the integration of insights generated by the different approaches to securitisation and enhances the analytical and explanatory depth of the concept. As part of its theoretical foundation, the book further presents a fundamentally new image of long standing theoretical and conceptual challenges within speech act inspired approaches including the reformulation of central analytical categories such as the speaker audience context nexus. By explaining securitisation as signifying the boundaries of the construction of meaning, it presents an original understanding of securitisation which is deeply integrated into the structures of the social construction of meaning. On this basis, the book offers a new understanding of successful securitisation factors and insights into aspects that render specific objects more or less likely for securitisation. The book proceeds to discuss two central aspects of the securitisation debate: The constitution of power as well as an exploration of the nature of the political and politicisation. An empirical case study on the development security nexus offers further insights into the applicability of the theoretical model. This book will appeal to students, researchers and scholars of political science and international relations. IR interested in a better understanding of IR theory, realism, critical security studies and discourse analysis.

Nutrition and Food Security in India Jalandhar Pradhan, 2025-11-01 This volume focuses on pace and progress in India towards achieving various targets of SDG2 End hunger, achieve food security and improved nutrition and promote sustainable agriculture and SDG3 Ensure healthy lives and promote well-being for all at all ages. The chapters provide detailed analyses of several programmes and schemes that exist to address the issue of nutrition and food security in India such as the National Nutrition Mission (NNM) launched in 2018 with challenging goals to eradicate malnutrition. It examines why, despite efforts, public health crisis like malnutrition in several forms and food insecurity remains grim across the Indian states. The book relies mostly on the recently published National Family Health Survey (NFHS) data 2019-21 which indicates a need for substantial improvements across multiple domains to achieve the global SDG targets by 2030. The book addresses three broad themes: trends and determinants of public health, nutrition, food security and public policy equity in nutrition and food security. Chapters have been contributed by academic researchers as well as policy makers and experts working at the grassroots level to present a holistic picture. The book is thus a comprehensive blend of theoretical perspectives and practical insights, providing practical knowledge, insights and examining nutrition and food security from

varied dimensions including policy agriculture health economics and sociology Furthermore it integrates latest research findings and data ensuring that readers are presented with the most up to date information and insights The use of lucid language and real world examples aim to facilitate a broader readership Its multidisciplinary approach enables readers to gain a more comprehensive understanding of the complex issues at play making the book a valuable resource for researchers policymakers and practitioners
