

Software – The use of software that I use will be part of my constraint as there may be compatibility issues with using this project.

Success criteria:

The success criteria that is needed is to show how my system is successful and is a really good solution of making users aware of what is expected of them and by encouraging them to extend themselves by looking through each bit on my table.

User interface design:

Here I will show my design layouts and it would usually refer to graphical user interfaces to focus on looks or style and give a quick brief of how the display will look like. This design can then be used for optimisation later.

My design is shown below:
