The Model Maker A World War II Veteran S Story:

The Model Maker Brett S. Weber, 2006 The Model Maker is inspired by the personal account of a World War II veteran s experiences during the Battle of the Bulge Bill spends a good deal of his time working on his model airplanes They mean more to him than just a usual hobby however They remind him of a time and a place when these models were replaced with real planes and his tranquil rural setting was replaced with gunfire thick forests and an ever present danger Through his models he recalls his story in a simple quiet way that belies the harsh reality of the Battle of the Bulge This story is meant to capture the interest of the young reader and to serve as a springboard into an important historical lesson The event of World War II was a pivotal point in modern history It is imperative that the lessons learned by this Greatest Generation should never be lost or forgotten

Making Men, Making History Peter Gossage, Robert Rutherford, 2018-05-01 What has it meant to be a man in Canada Alexander Ross fur trader Percy Nobbs architect fisherman fencer Andy Paull residential school survivor and athlete Yves Charbonneau jazz musician and commune member James black and gay in postwar Windsor Who were these men and how did they identify as masculine Populated with figures both well known and unknown Making Men Making History frames masculinity as a socially and historically constructed category of identity susceptible to variation across time place and social context This examination of historical Canadian masculinities reveals the dissonance between hegemonic ideals of manhood and masculinity and the everyday lives of men and boys The volume showcases some of the best new work in masculinity studies With an introduction that contextualizes the international origins of the field Making Men Making History is the first book to explore these themes entirely in Canadian historical settings

American History in the Making Mike Henry, 2023-05-12 History is full of examples where there are important stories that took place which coincided with a landmark event There is no shortage of items worth mentioning that have been overshadowed by other aspects of history This book is about those events with one dedicated to each day of the year that it took place The United States doesn't have a prolonged period of history like some other countries although for a nation that has been around for fewer years the events are interesting exciting and can often bring a smile

science and war are intimately interwoven masculine occupations and preoccupations and conservative men and their interests drive the climate change denial machine We also see that climate policymakers who embrace big science approaches and solutions to climate change are predominantly male with an ideology of perpetual economic growth and an agenda that marginalizes the interests of women and developing economies The book uses vivid case studies to highlight the often surprising gendered impacts of climate changes This new edition is a thorough update that includes revised and new chapters and new material that takes account of the significant advances in climate research environmental and social theory and the many political and social challenges posed in the wake of US elections Covid 19 pandemic and rapidly changing climate and environment The new edition also takes account of important social and cultural movements that resist challenges to women s rights and advocate for gender sexuality and racial justice This book will appeal to students researchers and academicians interested in environmental studies and gender studies It also will be of interest to policymakers activists and others involved with environmental policy and governance

The CSS Arkansas Myron J. Smith, Jr.,2014-01-10 While the Monitor and Merrimack are the most famous of the Civil War ironclads the Confederacy had another ship in its flotilla that carried high hopes and a metal hull The makeshift CSS Arkansas completed by Lt Isaac Newton Brown and manned by a mixed crew of volunteers gave the South a surge of confidence when it launched in 1862 For 28 days of summer the ship engaged in five battles with Union warships falling victim in the end only to her own primitive engines The saga of the CSS Arkansas represents the last significant Rebel naval activity in the war s Western theater
