Quotations Carl C. Gaither, Alma E. Cavazos-Gaither, 2008-01-08 Scientists and other keen observers of the natural world sometimes make or write a statement pertaining to scientific activity that is destined to live on beyond the brief period of time for which it was intended This book serves as a collection of these statements from great philosophers and thought influencers of science past and present It allows the reader quickly to find relevant quotations or citations Organized thematically and indexed alphabetically by author this work makes readily available an unprecedented collection of approximately 18 000 quotations related to a broad range of scientific topics **Science and Civilisation in China:**

Volume 3, Mathematics and the Sciences of the Heavens and the Earth Joseph Needham, 1959 After two volumes mainly introductory Dr Needham now embarks upon his systematic study of the development of the natural sciences in China The Sciences of the Earth follow geography and cartography geology seismology and mineralogy Dr Needham distinguishes parallel traditions of scientific cartography and religious cosmography in East and West discussing orbocentric wheel maps the origins of the rectangular grid system sailing charts and relief maps Chinese survey methods and the impact of Renaissance cartography on the East Finally and here Dr Needham's work has no Western predecessors there are full accounts of the Chinese contribution to geology and mineralogy *Re-Reading Leonardo* Claire Farago, 2017-07-05 For nearly three centuries Leonardo da Vinci's work was known primarily through the abridged version of his Treatise on Painting first published in Paris in 1651 and soon translated into all the major European languages Here for the first time is a study that examines the historical reception of this vastly influential text This collection charts the varied interpretations of Leonardo's ideas in French Italian Spanish English German Dutch Flemish Greek and Polish speaking environments where the Trattato was an important resource for the academic instruction of artists one of the key sources drawn upon by art theorists and widely read by a diverse network of artists architects biographers natural philosophers translators astronomers publishers engineers theologians aristocrats lawyers politicians entrepreneurs and collectors The cross cultural approach employed here demonstrates that Leonardo's Treatise on Painting is an ideal case study through which to chart the institutionalization of art in Europe and beyond for 400 years The volume includes original essays by scholars studying a wide variety of national and institutional settings The coherence of the volume is established by the shared subject matter and interpretative aim to understand how Leonardo's ideas were used With its focus on the active reception of an important

text overlooked in studies of the artist's solitary genius the collection takes Leonardo studies to a new level of historical inquiry Leonardo da Vinci's most significant contribution to Western art was his interpretation of painting as a science grounded in geometry and direct observation of nature One of the most important questions to emerge from this study is what enabled the same text to produce so many different styles of painting **The Discoverers** Daniel J.

Boorstin, 2011-01-26 An original history of man's greatest adventure his search to discover the world around him In the compendious history Boorstin not only traces man's insatiable need to know but also the obstacles to discovery and the illusion that knowledge can also put in our way Covering time the earth and the seas nature and society he gathers and analyzes stories of the man's profound quest to understand his world and the cosmos *The National Union Catalog, Pre-1956 Imprints*, 1968 **The Loves of the Artists** Jonathan Jones, 2013-05-23 A sweeping epic history of the

Renaissance artists seen through the lens of something that perhaps occupied their thoughts and influenced their art the most sex Taking Donatello's provocative reinvention of the nude as his starting point Jonathan shows how the story of the Renaissance is the story of a sexual revolution The great artists of the 15th and 16th century were not just visionaries but lovers Jonathan argues that the famous nudes of Michelangelo and Titian are not abstract images of ideal beauty but erotic expressions of love and desire and that in order to understand the Renaissance we have to understand the sex lives of the men and women who defined it men like Raphael who obsessively painted his lover La Fornarina in the nude Michelangelo who made beautiful drawings of naked male bodies to present to the young man he adored and Rembrandt whose bedroom portraits of Hendrickje Stoffels are the frankest expressions of love anywhere in art Sweeping from its origins in Florence in the mid 15th century to its culmination in the work of Rubens and Rembrandt in the 17th *The Loves of the Artists* shows that the Renaissance invented eroticism as we know it and that the new ways of thinking about sex it engendered are crucial to understanding not only art but European culture as a whole Leonardo's Fables Giuditta Cirnigliaro, 2022-12-28 Leonardo

's *Fables* explores the compositional methods and sources of Leonardo's fables and their relationship to illustrations and scientific studies By concentrating on the chaotic character of Leonardo's textual and visual annotations the author gradually discloses the artist's creative thinking that uses the page as a space for experimentation *Fables* allow Leonardo to tie together his technical and artistic skills empirical observation and experience to reveal the interactive forces at the basis of physical phenomena and the tensions between painting and humanistic culture This study reevaluates Leonardo's fables as part of a literary aesthetic and scientific project aimed at the investigation of Nature **The Da Vinci Globe** Stefaan
