Recent developments in aDNA has reshaped our understanding of later European prehistory and at the same time also opened up for more fruitful collaborations between archaeologists and historical linguists Two revolutionary genetic studies published independently in Nature 2015 showed that prehistoric Europe underwent two successive waves of migration one from Anatolia consistent with the introduction of agriculture and a later influx from the Pontic Caspian steppes which without any reasonable doubt pinpoints the archaeological Yamnaya complex as the cradle of Core Indo European languages Now for the first time when the preliminaries are clear it is possible for the fields of genetics archaeology and historical linguistics to cooperate in a constructive fashion to refine our knowledge of the Indo European homeland migrations society and language For the historical comparative linguists this opens up a wealth of exciting perspectives and new working fields in the intersections between linguistics and neighbouring disciplines for the

archaeologists and geneticists on the other hand the linguistic contributions help to endow the material findings with a voice from the past The present selection of papers illustrate the importance of an open interdisciplinary discussion which will gradually help us in our quest of Tracing the Indo Europeans

Why Homer Matters Adam Nicolson, 2014-11-18 In this passionate deeply personal book Adam Nicolson explains why Homer matters to him to you to the world in a text full of twists turns and surprises In a spectacular journey through mythical and modern landscapes Adam Nicholson explores the places forever haunted by their Homeric heroes From Sicily awash with wildflowers shadowed by Italy's largest oil refinery to Ithaca southern Spain and the mountains on the edges of Andalusia and Extremadura to the deserted irradiated steppes of Chernobyl where Homeric warriors still lie under the tumuli unexcavated This is a world of springs and drought seas and cities with not a tourist in sight And all sewn together by the poems themselves and their great metaphors of life and suffering Showing us the real roots of Homeric consciousness the physical environment that fills the gaps between the words of the poems themselves Nicholson's is itself a Homeric journey A wandering meditation on lost worlds our interconnectedness with our ancestors and the surroundings we share This is the original meeting of place and mind our empathy with the past our landscape as our drama Following the acclaimed Gentry which established him as one of the great landscape writers working today Nicholson takes Homer's poems back to their source beneath the distant god inhabited mountains on the Trojan plains above the graves of the heroic dead we find afresh the foundation level of human experience

on Earth **Proceedings of the 19th Annual UCLA Indo-European Conference** Karlene Jones-Bley, 2008 *Mother Tongue*, 2008 **Indian Linguistics**, 2014 *Meeting Handbook* Linguistic Society of America, 2007 **Mémoires de la Société finno-ougrienne** Suomalais-ugrilainen Seura, 2012 Kaleidoscopic Grammar Junichi Toyota, 2009 This monograph deals with binary features in the evolution of human civilisation and cognition with a particular focus on language. Our life is surrounded by various pairs of binary features and this is termed binarism in this work. Binarism is pervasive, ranging from nature biological to culture anthropological and archaeological and without a doubt to language. Binarism serves as a good base for further development and as a system becomes more complex binarism is broken and more complex systems involving third or fourth options emerge. In the case of language the earliest human language as argued here consisted only of nouns; however these nouns had a distinction between active and inactive nouns. The active nouns referred to action or productivity which later turned into verbs and inactive nouns stayed as nouns. It was during this period that language became equipped with a base to develop further with a distinction between noun and verb. This is the onset of various changes towards the complexity of modern languages essentially kaleidoscopic grammar. Various changes in language stem from binarism and as languages evolve the pairs such as noun v verb are broken and a grammatical system in general becomes more complex. The importance of binarism is not restricted to language and it is a powerful tool in evolution at different levels. The pervasiveness of binarism is a specific feature that should not be overlooked in evolution as a whole.

Tartessian John T. Koch, 2013 Beyond the Aegean some of the earliest written records of Europe come from the south west what is now southern Portugal and south west Spain. Herodotus the Father of History locates the Keltoi or Celts in this region as neighbours of the Kunetes of the Algarve. He calls the latter the westernmost people of Europe. However modern scholars have been disinclined until recently to consider the possibility that the south western inscriptions and other early linguistic evidence from the kingdom of Tartessos were Celtic. This book shows how much of this material closely resembles the attested Celtic languages Celtiberian spoken in east central Spain and Gaulish as well as the longer surviving languages of Ireland, Britain and Brittany. In many cases the 85 Tartessian inscriptions of the period c 750 c 450 BC can now be read as complete statements written in an Ancient Celtic language.
