The Psychiatric Interview in Clinical Practice, Third Edition Roger A. MacKinnon, M.D., Robert Michels, M.D., Peter J. Buckley, M.D., 2015-10-20 Much has changed in the critical interval since the last edition of The Psychiatric Interview in Clinical Practice was published This new third edition provides an up to date examination of the psychiatric interview that reflects changes introduced in DSM 5 while continuing to recognize that describing symptoms and establishing a diagnosis

should command only a portion of the clinician's attention and that a patient's personal history must be elicited and character structure addressed in the clinical engagement. Significant advances have been made in biological psychiatry and research in genetics, cognitive neuroscience, psychopharmacology, brain imaging, and the neurosciences in general, continuing to inform the culture of psychiatry and providing growing insight into the etiology of mental illnesses. However, the book reflects the authors' belief that virtually all major psychiatric disorders are complex amalgams of genetic disposition and environmental influences. In this context, the psychiatric interview is a vitally important dialogue, and effective strategies are modeled through the use of clinical vignettes taken from the authors' experience. Topics and features of this new edition include: An updating of diagnostic considerations to reflect the publication of DSM-5. A chapter on interviewing the patient with dissociative identity disorder (DID), which is now recognized as an entity distinct from other psychopathological conditions and rooted in childhood trauma. The frequency of DID in the ambulatory setting has been repeatedly demonstrated and speaks to the need to accurately diagnose and treat this often debilitating disorder. An entirely updated chapter on interviewing the traumatized patient. A section on interviewing the patient of different background. The book emphasizes that the subjective experience of being different is universal and that psychiatry is enriched by recognizing and exploring that experience, validating its existence, and attempting to understand how it influences the patient's life. Continued emphasis on and inclusion of relevant case vignettes drawn from the authors' clinical experiences. Structural consistency across chapters with sections on psychopathology and psychodynamics, differential diagnosis, management of the interview, transference and countertransference, and so forth, which reinforces skills acquisition and makes the text easy to use. By creating a text that is aligned with DSM-5 while continuing to stress the importance of eliciting the patient's subjective experience and achieving a therapeutic dialogue, the authors of *The Psychiatric Interview in Clinical Practice* have done a great service to the profession and provided much needed guidance to mental health clinicians and trainees. *Making Freud More Freudian* Arnold

Rothstein, 2018-05-08. This book demonstrates the clinical value of making Freud more Freudian. The theoretical contributions of Charles Brenner are summarized and emphasized. They are built on an elaboration of Arlow's fantasy function and Freud's compromise formation. The author applies this theoretical perspective in elaboration of the concepts of narcissism, masochism, shame, and guilt to the distinction between psychiatric and psychoanalytic diagnoses, as well as to a variety of specific clinical topics. Finally, the author emphasizes that the ubiquity of unconscious conflict demonstrates that all perceptions are subjective and relationships intersubjective. **Working with Resistance** Martha Stark, 1995-04-01. Dr. Stark conveys to the reader not only how a psychodynamic therapy is practiced but how it works as well. Her writing style conveys the same clarity and steadiness so apparent in her clinical work. She successfully integrates the complexity of the most useful contemporary classical object relations and self-psychological perspectives with her rich clinical material. **The**

Psychoanalytic Literature Index, 1984 The Psychiatric Interview in Clinical Practice Roger A. MacKinnon, Robert Michels, Peter J. Buckley, 2006 Continuing to address the challenges in clinical interviewing this book offers a wealth of clinical wisdom useful for trainees in all of the mental health professions from medical students and psychiatric residents to psychologists social workers and nurses The Transformed Self Chana Ullman, 2013-06-29 This book is about the dramatic experience of religious conversion The phenomenon of religious conversion lies at the crossroad of several disciplines As the title of this book indicates my own interest in religious conversion is not sociological historical nor anthropological My primary interest is not even in the domain of the psychology of religion That is this book is not a comprehensive review of the social psychological factors that shape religious beliefs in general and religious conversions in particular Rather my primary interest is in the experience of conversion as an instance of a meaningful sudden change in the course of individual lives Religious conversion is examined in this book primarily from the point of view of the psychology of the self My aim is to elucidate the experience of religious conversion as a change in the self and to raise suggestions for the study of the self that derive from the data on religious conversion This interest dictated the scope as well as the methods of the present investigation Namely I have chosen to study individuals who have indeed changed visibly as a result of their conversion My inquiry was based on self report assuming the importance of the person's own point of view Finally my inquiry was semi clinical vii viii PREFACE based on the assumption of an underlying structure to the varieties of conversion experiences

Group, 1984 **Personality Disorders and Suicide** Hilario Blasco-Fontecilla, Enrique Baca-Garcia, Jerónimo Sáiz Ruiz, 2007 The main objective of this book is to present a clear and profound review of the role of PD on suicide behaviour Data on PDs different of BPD and antisocial PD are scarce The contributors are all clinicians and researchers focused on the study of suicide The book has two well differentiated parts the first one is a brief introduction to some theoretical issues that are considered basic to set the ground when approaching the second part which is devoted to research on the influence of personality and particularly PDs on suicidal behaviour In addition to the extensive review carried out the authors also present data on some of the research that their research group and others are carrying out in this area *Readings*, 1995
