OWNER'S MANUAL

Speaker System

Thank you for selecting this YAMAHA NS-90 speaker system.

PRECAUTIONS

- Read these precautions carefully before using your speaker.
- Any time you move the speaker, the relative position of your amplifier is a lower setting. Never allow your amplifier to be driven into "clipping." Otherwise the speaker may be damaged.
- When using an amplifier with a rated output power higher than the nominal input power of the speaker, care should be taken never to exceed the speaker's rated power.
- Do not attempt to clean the speaker with mechanical cleaning as this might damage the finish. To clean, wipe with a dry soft cloth.
- To prevent the speaker from being damaged, do not place the speaker where it will be subjected to direct sunlight or excessive humidity.
- Do not place the speaker where it is liable to be knocked over or struck by falling objects. Stable placement will also ensure better sound performance.
- Placing the speakers on the same shelf or rack as the turntable can result in feedback.
- Secure placement of speakers is also important to prevent vibration from the turntable or any external source from being passed to the speaker.

PLACING THE SPEAKERS

Place the speakers on a sturdy, vibration-free surface, on a soft, level stand.

■ Using as both stereo speakers

Best stereo images will be obtained when the speakers are correctly oriented as shown in the diagram.

■ Using as main speakers in a multi-channel system

Position the speakers on both sides of the TV. The positioning of speakers is important because it controls the whole sound quality of a multi-channel system. You can consult the Yamaha of Home Theater position by following the center's manual supplied with your receiver.

- **Using as front effect or rear speakers**
Mount on a wall at an angle or a shallow angle toward the front listening position for a fuller surround sound in a multi-channel system. Determine the best position and angle for the speakers by following the guidelines in the owner's manual supplied with your amplifier.

- **Mounting the speakers on a wall**
Mount the speakers on a wall by using the brackets provided on the back of the speaker. If your system has a front wall or wall mounted as shown in the diagram, and using the feature of the mounting bracket on the mounting bracket.

You can also use the screw holes on the back of the speaker to mount the speakers on a wall.

Notes

- Be sure to check the wall before attempting to mount these speakers on a wall. If necessary, please consult an installation specialist or the shop where the speakers were purchased.
- When hanging speakers on a wall, use the supplied wall mount. When installing, please only use screws that are appropriate for the weight of the speaker. Use the screws of the wall, etc.

CONNECTIONS TO YOUR AMPLIFIER

Before making connections, make sure that the amplifier is switched off.

■ Connections

- Connect the speaker input terminals of the rear of the speakers to the speaker output terminals of your amplifier with the speaker cables.
