Unit 1: The Earth and Its Features

Lesson 1: The Earth's Surface

1. The Earth's surface is made up of land and water. The land is called the lithosphere, and the water is called the hydrosphere.

2. The lithosphere is made up of the crust and the upper part of the mantle. The hydrosphere is made up of the oceans, lakes, rivers, and glaciers.

3. The lithosphere is made up of tectonic plates. These plates move around the Earth, and they can collide, pull apart, or slide past each other.

4. The hydrosphere is made up of water in different states. There is liquid water, ice, and water vapor. Water is essential for life on Earth.

5. The Earth's surface is constantly changing. This is called erosion. Erosion is caused by wind, water, and ice. It can shape the land into mountains, valleys, and rivers.

6. The Earth's surface is also shaped by volcanic activity. Volcanoes can erupt, sending lava and ash into the air. This can create new land and change the shape of the Earth's surface.

7. The Earth's surface is also shaped by the movement of tectonic plates. When plates collide, they can create mountains and earthquakes. When plates pull apart, they can create valleys and oceans.

8. The Earth's surface is also shaped by the movement of glaciers. Glaciers can move slowly across the land, carving out valleys and leaving behind deposits of rock and sediment.

9. The Earth's surface is also shaped by the movement of wind. Wind can create sand dunes, sandstorms, and other features. It can also erode the land, creating canyons and other shapes.

10. The Earth's surface is also shaped by the movement of water. Water can erode the land, creating rivers, lakes, and oceans. It can also deposit sediment, creating new land and changing the shape of the Earth's surface.

Teaching Numeracy Margie Pearse, K. M. Walton, 2011-03-23 Do some of your students arrive at wildly wrong answers to mathematical problems but have no idea why? If so, they are not alone. Many students lack basic numeracy, the ability to think through the math logically, solve problems, and apply it outside of the classroom. This book outlines nine critical thinking habits that foster numerate learning and details practical ways to incorporate those habits into instruction. Referencing the new common core standards, NCTM standards, and established literacy practices, the authors include how to use this in my math class tomorrow, applications throughout the book which show you how to monitor and repair students' understanding, guide students to recognize patterns, represent mathematics non-linguistically, encourage questioning for understanding, develop students' mathematics vocabulary, create a collaborative environment. Latter chapters show how to develop numeracy-rich lesson plans and provide several ready-to-use models with clear directions and student handouts. The book's practices, activities, and problems will help you move your students from simply doing the math to a deeper understanding of how to think through the math.
