3LCD installation projector with 4500 ANSI lumens

The VPL-FW41 is the new Wide-XGA addition to the F-series range of projectors. Like its counterparts, (the VPL-FE40 and VPL-FX40 and the newly introduced VPL-FX41), it features an ultra modern sleek design and Sony's innovative BrightEra technology. The VPL-FW41 delivers an impressive 4500 ANSI lumens and a colour light output of 4500 lumens. It is capable of projecting bright and clear pictures even in high ambient lighting environments. This makes it ideal to deliver high-impact multimedia presentations in locations such as boardrooms, large conference rooms, R&D facilities and university classrooms. With outstanding functionality, simple operation, and network capabilities, this projector will deliver seamless presentations. Its ability to accept a broad array of signals, including those from sources equipped with the latest High-Definition Multimedia Interface (HDMI), further increases the dynamics of the presentation. This projector can be purchased with or without lenses.

This product comes with PrimeSupport – fast, hassle-free repairs and a helpline offering expert technical advice. Which gives you the peace of mind that Sony is looking after your equipment, and your business.

Features

Outstanding Colour Light output Brightness of 4500 Lumens in a Beautifully Styled Projector

The VPL-FW41 data projector provides an outstanding brightness of 4500 lumens. This allows for dynamic, large-screen presentations even in high ambient lighting environments. By combining a new generation of inorganic LCD panels that utilize Sony BrightEra technology with a powerful 275W lamp, these beautifully

styled projectors are excellent for bringing your presentations to life.

Wide-XGA Resolution (WXGA)

The VPL-FW41 offers native WXGA (1280 x 800) resolution for high picture quality.

3LCD Projection System

Because the VPL-FW41 adopts a 3LCD projection system, projected images are bright and natural. 3LCD is a projection system using three LCD panels (also known as high-temperature polysilicon or HTPS). This system provides high light transmission and excellent colour reproduction. It also provides smooth gradients in dark areas, and even helps prevent colour break-up.

Dynamic Detail Enhancer (DDE) for High-Quality Video Images

This unique Sony video-enhancing technology incorporated in the VPL-FW41 projector generates high-quality images of outstanding clarity. For interlaced video sources, I/P (Interface/Progressive) conversion is applied to the signals to project clear and sharp progressive images. When displaying film-originated sources, signals converted by 2-3/2-2 pull down are detected, and each frame of the original film is accurately reproduced.

12-bit 3D Gamma Correction and 3D Digital Comb Filter

The VPL-FW41 projector incorporates 12-bit 3D Gamma Correction circuitry to perform highly accurate gamma correction, achieving uniform image color and brightness that extends right to the corners of the screen. What's more, the 3D Digital Comb Filter separates Y signals from C signals with great accuracy, which emphasises fine images and shape boundaries.

Power Zoom/Focus/Lens Shift (Horizontal and Vertical)

The Zoom, Focus, and Horizontal and Vertical Lens Shift functions available with the projectors' supplied power-operated lens and optional lenses can be controlled both from the projector control panel and the supplied Remote Commander unit. Images can be
