diagrams and related structures including finite presentations for the propagator algebra the algebra of discrete systems the algebra of open dynamical systems and the relational algebra A partial verification of David Spivak's conjecture regarding the quotient freeness of the relational algebra is also provided In the final part the author constructs operad maps between the various operads of wiring diagrams and identifies their images Assuming only basic knowledge of algebra combinatorics and set theory this book is aimed at advanced undergraduate and graduate students as well as researchers working in operad theory and its applications Numerous illustrations examples and practice exercises are included making this a self contained volume suitable for self study
