The British National Bibliography Arthur James Wells, 2006 [First Aid for the USMLE Step 1, 2003](#) Vikas Bhushan, Chirag Amin, Tao Le, 2003 **The Handbook of Adult Language Disorders** Argye E. Hillis, 2015-05-01. The Handbook of Adult Language Disorders is the essential guide to the scientific and clinical tenets of aphasia study and treatment. It focuses on how language breaks down after focal brain damage, what patterns of impairment reveal about normal language, and how recovery can be optimally facilitated. It is unique in that it reviews studies from the major disciplines in which aphasia research is conducted: cognitive neuropsychology, linguistics, neurology, neuroimaging, and speech language pathology, as they apply to each topic of language. For each language domain, there are chapters devoted to theory and models of the language task, the neural basis of the language task, focusing on recent neuroimaging studies, and clinical diagnosis and treatment of impairments in that domain. In addition, there is broad coverage of approaches to investigation and treatment from leading experts, with several authors specializing in two or more disciplines. This second edition focuses on characterizing the cognitive and neural processes that account for each variant of aphasia as a first step toward developing effective rehabilitation, given that aphasia is one of the most common and disabling consequences of stroke. The best and most authoritative handbook in the field. The Handbook of Adult Language Disorders is the definitive reference for clinicians and researchers working in the scientific investigation of aphasia.

Memory Disorders in Clinical

Practice Narinder Kapur,2017-09-29 This book has been specially designed to give practical help to those who have to deal with diagnosis and subsequent management of patients with memory dicturbance resulting from specific types of cerebral pathology The author achieves this by organising his book on the basis of clinical aetiology While anatomical and psychological perspectives are introduced the emphasis is on approaches which will help clinicians in the management of patients with specific neurological diseases For example the essential topic of differential diagnosis is given prominence throughout the principles of diagnositc assessment are discussed in a separate chapter and specific diagnostic features are outlined in each of the chapters dealing with individual cerebral pathologies The author draws on his own extensive experience as a practising clinical neuropsychologist to describe and evaluate the range of existing memory test procedures and suggest additional procedures as appropriate Full references are also given for those wishing to develop their own assessment of therapeutic procedures Mainly intended for practising neurologists and clinical neuropsychologists anyone whose work brings them into contact with patients suffering from memory disturbance will find this book invaluable
