Partnerships in Urban Property Development Nigel Dubben, Brendan

Williams, 2009-06-22. This book covers partnerships in the broadest sense, presenting a critical account of the whole range of partnerships in property development. The emphasis is on the relationship between developers and landowners, developers and funders, and the provision of public services through the use of private finance. The authors draw on their own professional experience of running property partnerships and, with carefully researched case studies, present the insider view, making a potentially dry and complex subject accessible and lively. The book moves beyond a theoretical overview and, by illuminating the reality of property partnerships, shows for example exactly how the government is procuring schools, hospitals, and roads. This clear and objective analysis sets property partnerships in their economic and political contexts and will be of topical interest to surveyors and developers in both private practice and local authorities, as well as to funders. Students in surveying, estate management, and real estate development will also find this a concise and authoritative guide.

Contents: 1. The Public and Private Sectors; 2. The Property Development Process; 3. Partnership Negotiations using Development Appraisal Techniques; 4. The Private Finance Initiative; 5. Public-Private Partnerships: the Urban Experience of Dublin; 6. Property Funding Partnerships; 7. Development Partnerships and Landowners; 8. International Trends and Public-Private Partnerships; 9. Economic Background and Future Trends.

Developing Property Sustainably Sara J.

Wilkinson, Sarah L. Sayce, Pernille H. Christensen, 2015-06-05. *Developing Property Sustainably* introduces readers to the key issues surrounding sustainable property development in the global marketplace. Pulling together received wisdom and original research, the authors provide a clear and practical overview of the sustainable property development process, as well as a critical appraisal of the problems faced by global built environment stakeholders. Throughout, the authors demonstrate how the property development industry could and should respond better to debate on sustainable practices in the built environment by adopting more rigorous measurement techniques and sustainable approaches. Starting by exploring key definitions and stakeholders, the book goes on to explore finance, planning, construction, procurement, occupation, retrofit, and lifecycle sustainability in order to provide the reader with a detailed understanding of all the issues involved in the delivery of sustainable property development from inception to occupation and beyond. Throughout the book, international case studies are used to demonstrate how sustainable property development is applied in practice around the world. With a logical chapter

structure and accessible writing style *Developing Property Sustainably* would be perfect for use on undergraduate and postgraduate modules and courses in real estate development property and urban development and other built environment programmes
