practices *Employee Engagement with Sustainable Business* Nadine Exter, 2013-07-18 Sustainability is and continues to grow as a key issue for organizations in the board room with investors customers and regulators and from employees whose demands on organizations include improving their social and environmental performance in return for loyalty and commitment However as well as employees being a driver for organizations to embrace corporate sustainability employees are also one of the most critical assets in enabling an organisation to understand and be able to deliver to its economic social and environmental responsibilities Research shows that employees of all types are vital in the pursuit of sustainability however to date there is no one source that shows all of these identified types of employees and how they are involved in the sustainability process This book fills that gap with interviews and case studies for each type of employee as well as up to date research and analysis of the critical role of social intrapreneurs and leaders within organisations The book uses real life examples along with the latest research in an informative and accessible style Management theory is used throughout such as motivation leadership skills and organisational behaviour but this is discussed through examples rather than in a theoretical manner This book will provide insight examples and advice on the different types of employees who are and can contribute to a sustainable world via the organisation they work for what they are doing from within the organization to contribute to societal economic and environmental sustainability *Towards Sustainable Development Goal of Zero Hunger: Exploring the Dynamic Relationships between Food Pricing, Agriculture, and Food Security* Noshaba Aziz, Wioletta Żukiewicz-Sobczak , Ruishi Si, 2025-10-16 United Nations Sustainable Development Goal SDG 2 aspires to eradicate hunger by 2030 emphasizing the intricate relationships between agriculture food security and nutrition However this noble pursuit faces formidable challenges in emerging countries due to a confluence of international disruptions Climate change the COVID 19 pandemic and geopolitical conflicts like the war in Ukraine have triggered sharp spikes in commodity prices amplifying food security concerns particularly in developing nations The Food and Agriculture Organization of the United Nations recently reported the highest global food price increase since the 1990s in March This commodity price inflation in turn reverberates across agriculture impacting not only a nation s economy but also its food production capacity Elevated commodity prices drive up the costs of agricultural inputs such as fertilizers pesticides and fuel compelling farmers to pass these expenses on to consumers in the form of higher food prices Moreover country specific economic factors within the agricultural sector including land ownership technology adoption farming practices and infrastructure further complicate the food security landscape Therefore the intricate interplay between commodity price inflation agriculture and food security is significantly influenced by a nation s unique economic dynamics within its agricultural sector Effectively addressing these challenges necessitates a blend of international and domestic policy measures to ensure that the benefits of agricultural progress reach the broader population **Sustainable Marketing Planning** Neil Richardson, 2024-04-16 This book provides practical insights tools and frameworks to help readers produce tactically and strategically appropriate marketing

plans Showing how to embed sustainability in these plans students will be shown how to implement changes while being encouraged to reflect on why they are needed The text reflects on contemporary themes that impact on sustainable marketing planning including consumer behaviour entrepreneurialism internal marketing services international marketing event management and digital marketing The second edition has been fully updated with a greater focus on the issues surrounding sustainability including the environmental challenges facing businesses sustainable accreditation and integrating the UN SDGs It provides background on the value discourses that underpin sustainability incorporates new examples and case studies from broader regions around the world and introduces TBL based loyalty Full of tools and frameworks to improve comprehension including chapter by chapter learning outcomes summaries exercises applied activities and mini case studies it bridges the gap between theory and practice effectively and accessibly Presenting contemporary themes and challenges at the cutting edge of business research and practice this book provides core reading for advanced undergraduate and postgraduate students of sustainable marketing marketing planning and marketing strategy as well as professionals seeking to improve the competitive advantage of their organisations Online resources for the use of instructors include PowerPoint lecture slides and a multiple choice questions section

Innovation in Developing Countries Nobuaki Matsunaga, 2019-02-06 The main focus of this book is innovation for developing countries what is the innovation for what are the current conditions of the innovation and how to effectively innovate in developing economies It contains the latest insights and analyses of innovation based on intensive interviews as well as primary and secondary data of manufacturing firms in developing countries Vietnam and Laos in particular Innovation requires something new Integration of deep understanding of innovation and econometric analyses are a new combination in this book which contrasts with other similar books in the field This new approach may benefit policy makers as well as scholars and firms in poor countries The main points of the book are summarized as follows First for most poor countries learning innovation is considered the key to economic growth rather than leading edge innovation which is a more popular theme in similar books on innovation Second an overwhelming majority of innovations currently used in poor countries are developed in advanced countries so technology transfer and learning from the latter are a fundamental source of innovation in the former Third a surprisingly high rate of firms around 50% reported that they introduced new or significantly improved products or processes in poor countries and this high innovation rate is a great benefit to be enhanced by government policies Fourth the common factors driving innovation of manufacturing firms in Vietnam and Laos are 1 human capital 2 social capital and 3 innovation in the past Fifth the impact of innovation on firm performance is found to be mixed in these countries Sixth so far almost all studies on innovation have focused on product or process innovation but additional light is shed here on organizational innovation
