J. Calvaer, 2014-05-23 The control of power systems and power plants is a subject of worldwide interest which continues to sustain a high level of research development and application Papers pertaining to areas directly related to power systems and representing the state of the art methods are included in this volume The topics covered include security analysis dynamic state estimation voltage control power plant control stability analysis data communication expert systems and training simulators for power plants This interchange between those involved in the research and those involved in the practical applications of new ideas and developments provide a comprehensive reference source for all involved in the power industry **Cycle World Magazine**, 2001-01 *Engineering Geological Advances in Japan for the New Millennium* Y. Kanaori, Kazuyoshi Tanaka, M. Chigira, 2000-11-03 The geology of the Japanese Islands is enormously complicated because of the active tectonism that has taken place on the boundary between the Pacific and Eurasian plates Geological formations there are intricately deformed and displaced by many active faults Hence in planning for and siting large construction projects such as nuclear power stations underground power stations and the underground facility for High Level Radioactive Waste HLW more detailed investigations are necessary than in more stable parts of the world Only then can assessments be made as to the long term stability hydrological characteristics and mechanical characteristics of geological conditions This book offers recent research studies in engineering geology in Japan

It contains 27 papers of scope and importance sufficient to allow engineering geologists throughout the world to understand more of the present state of research and study in Japan. The title also includes a number of current topics in which Japanese engineering geologists have participated: the planning for and siting of large construction such as nuclear power stations, underground power stations and the underground facility for High Level Radioactive Waste (HLW); the construction project of highways and nuclear power stations and new energy developments such as those for geothermal energy; the countermeasures for natural hazards caused by earthquakes, landslides and slope and stone deterioration and alteration because of weathering at and near the Earth's surface.
