Reaching the Unseen Children Jean Gross, 2021-11-17 Reaching the Unseen Children provides a powerful and accessible resource for schools working to raise the attainment of all disadvantaged pupils with particular emphasis on white children from low income backgrounds This group especially boys consistently on average underperform in the education system and the effects of COVID 19 will only have widened the gap Drawing on her long experience of working with disadvantaged and left behind communities Jean Gross describes the path that many children take from early language delays to persistent literacy and numeracy difficulties which lead to progressive disengagement from learning She argues that progress will only be made through early intervention and building pupils sense of capability

and sets out low cost low effort ways in which teachers can transform outcomes for their students through the everyday language they use the expectations they convey and the relationships they build with pupils and their parents Providing practical evidence based strategies and case studies of schools with outstanding practice this an essential guide for anyone working in education who is seeking equity for all their pupils **Resources in Education** ,1995 *Bulletin of the Atomic Scientists* ,1972-09 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world **Encyclopedia of the Sciences of Learning** Norbert M. Seel,2011-10-05 Over the past century educational psychologists and researchers have posited many theories to explain how individuals learn i e how they acquire organize and deploy knowledge and skills The 20th century can be considered the century of psychology on learning and related fields of interest such as motivation cognition metacognition etc and it is fascinating to see the various mainstreams of learning remembered and forgotten over the 20th century and note that basic assumptions of early theories survived several paradigm shifts of psychology and epistemology Beyond folk psychology and its na ve theories of learning psychological learning theories can be grouped into some basic categories such as behaviorist learning theories connectionist learning theories cognitive learning theories constructivist learning theories and social learning theories Learning theories are not limited to psychology and related fields of interest but rather we can find the topic of learning in various disciplines such as philosophy and epistemology education information science biology and as a result of the emergence of computer technologies especially also in the field of computer sciences and artificial intelligence As a consequence machine learning struck a chord in the 1980s and became an important field of the learning sciences in general As the learning sciences became more specialized and complex the various fields of interest were widely spread and separated from each other as a consequence even presently there is no comprehensive overview of the sciences of learning or the central theoretical concepts and vocabulary on which researchers rely The Encyclopedia of the Sciences of Learning provides an up to date broad and authoritative coverage of the specific terms mostly used in the sciences of learning and its related fields including relevant areas of instruction pedagogy cognitive sciences and especially machine learning and knowledge engineering This modern compendium will be an indispensable source of information for scientists educators engineers and technical staff active in all fields of learning More specifically the Encyclopedia provides fast access to the most relevant theoretical terms provides up to date broad and authoritative coverage of the most important theories within the various fields of the learning sciences and adjacent sciences and communication technologies supplies clear and precise explanations of the theoretical terms cross references to related entries and up to date references to important research and publications The Encyclopedia also contains biographical entries of individuals who have substantially contributed to the sciences of learning the entries are written by a distinguished panel of researchers in the various fields of the learning
