Clinical Application of Artificial Intelligence in Emergency and Critical Care Medicine, Volume IV Zhongheng Zhang, Rahul Kashyap, Longxiang Su, Nan

Liu, Qinghe Meng, 2024-01-23 This Research Topic is the fourth volume of the series Clinical Application of Artificial Intelligence in Emergency and Critical Care Medicine Volume I Clinical Application of Artificial Intelligence in Emergency and Critical Care Medicine Volume I Volume II Clinical Application of Artificial Intelligence in Emergency and Critical Care Medicine Volume II Volume III Clinical Application of Artificial Intelligence in Emergency and Critical Care Medicine Volume III Analytics based on artificial intelligence has greatly advanced scientific research fields like natural language processing and imaging classification Clinical research has also greatly benefited from artificial intelligence Emergency and critical care physicians face patients with rapidly changing conditions which require accurate risk stratification and initiation of rescue therapy Furthermore critically ill patients such as those with sepsis acute respiratory distress syndrome and trauma are comprised of heterogeneous population The one size fit all paradigm may not fit for the management of such heterogeneous patient population Thus artificial intelligence can be employed to identify novel subphenotypes of these patients These sub classifications can provide not only prognostic value for risk stratification but also predictive value for individualized treatment With the development of transcriptome providing a large amount of information for an individual artificial intelligence can greatly help to identify useful information from high dimensional data Altogether it is of great importance to further utilize artificial intelligence in the management of critically ill patients *Coping with Life Stress, volume II*

Alexander V. Libin, Elena V. Libin, Walter Erich Penk, Nawar Shara, 2024-02-09 This Research Topic is the second volume of the Research Topic Coping With Life Stress Please see the first volume here Existing studies on coping with stress and life difficulties are very contradictory Traditional approaches while identifying cognitive emotional and behavioral aspects of coping often confuse the modality of the strategy with its functionality and outcome This conceptual drawback presents quite a few challenges to the study of efficient and inefficient strategies Perception of the incongruence between modalities cognitive emotional or behavioral of a particular strategy and its functionality or organizational efforts efficient vs inefficient hinders the development of an integrated methodology for a generalized coping with life stress process The absence of general principles for classification of efficient and inefficient coping poses methodological as well as practical difficulties in their diagnostics and differentiation thereby causing additional obstacles in the systematic study of this important phenomenon The Coping with Life Stress approach is focused on research based on the translation of scientific knowledge regarding problem solving processes into practical applications geared toward improvement of individual life learning or coping skills *The Cranial Nerves in Neurology* Wolfgang Grisold, Walter Struhal, Anna Grisold, 2023-11-20 This book
