Dahlquist,1998-11-26 The use of technical market indicators has long been a controversial subject highly regarded by some and treated with great skepticism by others Yet the number of indicators and the number of individual investors and finance professionals using them continues to grow Now more than ever there is an urgent need for objective testing to determine the validity of these indicators Technical Market Indicators is a unique study of the performance of many of the most widely used technical analysis indicators The authors explore in an unbiased rigorous manner whether these indicators consistently
