Managing the Paralympics Simon Darcy, Stephen Frawley, Daryl Adair, 2017-02-08 This book critically examines the planning management and operations of the world's premier event for Para sport athletes. Noting a lack of research into how these games are planned and managed, the authors of this contributed volume discuss how the Paralympics are essentially different to the Olympics and what this means for their management. **Managing the Paralympics** explores how the organizers and connected stakeholders effectively organize and deliver the Paralympics, taking into account what has been learned from previous events. Including emergent models of best practice from event management, project management and sport management literature, the book gives an insight into the planning of one of the world's biggest sporting events that encompasses ten impairment types and multiple sport classes within sports.

Managing the Olympics S. Frawley, D. Adair, 2013-07-23 The Olympic Games are the world's most complex and challenging sport mega event to organize. **Managing the Olympics** is the first ever attempt to bring together the world's leading Olympic management researchers in one book and draws on the latest research into the management challenges faced by the organizers and key stakeholders of the Games.

Urban Transformations through Exceptional Architecture Nadia Alaily-Mattar, Alain Thierstein, 2021-05-30 **Urban Transformations through Exceptional Architecture** focusses on the nexus between architecturally exceptional projects and the city. It addresses the following questions: How can the complexity of these projects be comprehended? What roles do the political contexts play in the commissioning of such projects and what audiences do these projects serve? How has the granting of professional recognition for architects changed and what will this change mean to measures of exceptionality in architectural design? What roles do the architectural competitions play in the process of commissioning the design of architecturally exceptional projects and do design competitions as an urban planning tool grant high value designs? Architecturally exceptional projects are situated in physical urban fabrics. How can this situatedness be analysed and what different values does the urban design dimension of these projects add? By considering diverse aspects of architecturally exceptional projects, the chapters in this book utilise a variety of research methods. They bring into dialogue a range of themes regarding the architectural, urban design and political aspects of these projects. This volume illustrates that multidisciplinary might well be the best strategy to balance the risks of over-simplification and the challenges of complexity in analysing these exceptional projects and the city in its ever-transformative process. The chapters in this book were originally published as a special issue of the *Journal of Urban Design*.

Strategische Gestaltung des Lebenszyklus von Mega-Events Dirk Weiss, 2009-09-30 Dirk P. Wei beschreibt das Phänomen Mega-Events erstmals umfassend und entwickelt ein Planungsinstrument, das Bewerber um ein Mega-Event und seinen Organisatoren eine hilfreiche Heuristik für die Bewältigung von Planungsaufgaben bietet.

Failed Olympic Bids and the Transformation of Urban Space Robert Oliver, John Lauermann, 2017-09-15 This book evaluates why cities choose to bid for the Olympics, why Olympic bids fail and

whether cities can benefit from failed bids Attention is shifted away from host cities or winners to consider the impact of the bidding process on urban development in losing cities Oliver and Lauermann show that bidding is often a politically strategic exercise as planning ideas are recycled from one bid project to the next As Olympic bids become more deeply embedded in urban development and bid teams engage in legacy planning Oliver and Lauermann demonstrate that bid failure is rarely definitive and is often a desirable result This volume adds a new and innovative perspective to Olympic Studies and mega events more broadly with appeal to a variety of other disciplines including geography urban planning spatial politics and sport and civic policy An Introductory Guide to EC Competition Law and Practice Valentine Korah,1994 **Mega-Event**

Mobilities Noel B. Salazar,Christiane Timmerman,Johan Wets,Luana Gama Gato,Sarah Van den Broucke,2016-12-01 Global sports events are rarely far from the public eye Such mega events are about much more than the sporting competitions themselves They entail global exposure and intense struggles by different stakeholders This is the first book to examine sports mega events from a mobilities perspective It analyses the mobile construction of global sports mega events and the role this plays in managing labour imaginaries policies and legacies In particular the book focuses on the tension between the various mobilities and immobilities that are implied in the process of constructing a mega event It seeks to uncover the ways in which an event is a series of fluid interactions that occur sequentially and simultaneously at multiple scales in diverse spheres of interaction Contributions explore the dynamics through which mega events occur revealing the textures and nuance of the complex systems that sustain them and the ways that events ramify throughout the international system
