Open-file Report ,1978 Safe Drinking Water Rip G. Rice,2017-11-22 A review of the nation s new coverages serves as a ready reminder that drinking water safety is more than regional or local concern In recent times the print media alone has drawn attention to barium bacteria heavy metals and increasingly organic contaminants in public water supplies located in Florida Rhode Island Texas Oregon Illinois Minnesota North Carolina Michigan and California to name a few In an effort to address one of the major issues confronting the future of the nation s drinking water supplies chemical contamination the Drinking Water Research Foundation and the American Chemical Society presented the symposium Safe Drinking Water the Impact of Chemicals on a Limited Resource To add balance to the total presentation two papers were included that were not

part of the symposium Many questions as to the public significance of hundreds of organic chemicals known to be present in the national drinking water supply are waiting to be answered In some areas of the country aid rain induced alterations of the natural leaching process represent an unexplored potential source of toxic pollutants Finding workable ways to clean up the water supply will be an ongoing task Addressing these questions as well as investigating how other countries are responding to these problems the alternate sources available such as bottled water and point of use devices the presenters in this symposium have attempted to explain the problems situation and alternatives As progress is made in one area setbacks will occur in another As we eliminate problems thought chemical technology we often create others such as contamination of our waters While all the situations problems and alternatives are not discussed in these proceedings it is hoped that some attention will be brought to the public government and private sectors so that future work will be done to assure the nation of safe drinking water resources Rural Water Systems Planning and Engineering Guide Michael D.
